Identify all emailed requests by the title of the information collection.

**SUPPLEMENTARY INFORMATION:**

*Description:* The proposed information collection effort will gather data from end users of a toolkit of resources sponsored by the Children’s Bureau in collaboration with the Centers for Disease Control and Prevention under an interagency agreement. The toolkit is intended to support child welfare agency staff in the identification and support of children living with prenatal exposure to alcohol and other substances. The data collected will be used in a formative evaluation of the toolkit, which will be guided by three research questions: (1) To what degree do agency staff find toolkit resource to be relevant and applicable to their work?; (2) To what degree do toolkit resources change agency staff attitudes and increase staff knowledge?; (3) What implementation approaches and organizational supports facilitate toolkit use by child welfare agencies? Proposed data sources for this effort include five surveys: (1) a survey to measure users’ reactions to the toolkit; (2) a survey of users’ attitudes toward Prenatal Alcohol Exposure (PAE)-related issues; (3) a survey of users’ knowledge about PAE-related issues; and (4 and 5) two versions of a survey of transfer potential

and perceived competence, which measures users’ sense of competence in PAE-related knowledge and skills and the extent to which users believe they will transfer knowledge/skills to their work. One version of this instrument contains the full survey and will be administered after users have been exposed to the full toolkit and its resources. The second version contains a smaller selection of key items from the survey, tailored to collect information from users after their exposure to each of five key modules of the toolkit. All data will be collected over the course of 6–9 months in 2023.

*Respondents:* Child welfare professionals, including state and/or county-level directors of child welfare agencies; supervisors; program staff (e.g., investigation/intake, case management, foster care/adoption/permanency, etc.); staff working in specialist roles that align with toolkit resources (e.g., data/quality improvement specialists); local or state agency managers involved in determining agency strategic plans and practice guidance (e.g., substance-exposed newborn program manager); training system lead staff.
