SUPPLEMENTARY INFORMATION: The NRC is issuing two documents, a final EIS and a final PA. These documents are described in the following subsections.

I. Environmental Impact Statement

Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations* (10 CFR), "Final environmental impact statement—notice of availability," the NRC is making available NUREG-2243, the NRC's final EIS for a proposed license amendment that would allow UNC to place uranium mine waste into a repository at UNC's NRC-licensed uranium mill site and to make certain improvements at the site. Notices of availability of the draft EIS were published in the **Federal Register** (FR) on November 13, 2020, by the NRC (85 FR 72706) and the U.S. Environmental Protection Agency (85 FR 72649). After granting two extensions, the NRC closed the public comment period for the draft EIS on May 27, 2021. On June 17, 2021, in response to a request from the President of the Navajo Nation, the NRC re-opened the public comment period until November 1, 2021 (86 FR 32285). Appendix B of the final EIS contains summaries of and responses to the comments received. A separate report containing the as-received comments is available in the "Availability of Documents" section. This report follows the organization of EIS Appendix B.

Discussion

The NRC is issuing the final EIS for an application from UNC requesting an amendment to license SUA-1475 for the UNC mill tailings disposal site in McKinley County, New Mexico. The proposed license amendment would allow UNC to transfer and dispose of uranium mine waste from the nearby NECR Mine Site, located across New Mexico Highway 566 from the UNC Mill Site. Approximately 1 million cubic yards of mine-impacted soil and debris present at the NECR Mine Site (on primarily tribal trust lands) would be removed and placed in a repository to be constructed at the UNC Mill Site.
