CATEGORIES OF RECORDS IN THE SYSTEM:

This system consists of responses from students, their parents or legal guardians, teachers, administrators, service providers, and other adults to data collection instruments including information such as background and demographic data, functional measures (reports of children's functioning in cognitive, social, emotional, and physical domains), family characteristics, education and/or employment experiences, finances, aspirations, plans, and attitudes. Cognitive assessment scores, administrative and financial aid records, and high school and college transcripts are also appended to the records. The appended administrative records contain data such as attendance, program participation, and other information.

The records for service providers, schools/institutions, and local educational agencies contain information on numbers and characteristics of students, teaching staff, and administrators; data on

facilities, programs, services, and finances; and information related to student enrollment, persistence, completion, and performance. The records related to teachers and administrators contain, in addition to the above, data on certifications, training, experience, staff evaluations, salary, benefits, and attitudes and opinions related to various aspects of education and operations.

RECORD SOURCE CATEGORIES:

Information in the records comes from responses to survey and assessment instruments and from administrative records maintained by K–12 schools and school districts, postsecondary institutions, the Department, and third-parties, including State and Federal agencies, as well as vendors, such as the National Student Clearinghouse. Information in this system also may be obtained from other persons or entities from which data is obtained under routine uses set forth below.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

The Department may disclose information contained in a record in this system of records under the routine uses listed in this system of records without the consent of the individual if the disclosure is compatible with the purpose for which the record was collected. Any disclosure of individually identifiable information from a record in this system must also comply with the requirements of Section 183 of the ESRA (20 U.S.C. 9573) and its confidentiality standards that apply to all collection, reporting, and publication of data by NCES. Any disclosure of personally identifiable information (PII) from students' education records that was obtained from schools, school districts, postsecondary institutions, and other covered sources must also comply with the requirements of the Individuals with Disabilities Education Act (IDEA) (20 U.S.C. 1417(c); 34 CFR 300.610–300.611, 300.613–300.623, and 300.625–300.627) and the Family Educational Rights and Privacy Act (20 U.S.C. 1232g; 34 CFR part 99), which protect the privacy of student education records and the PII contained therein.

(1) *Contract or Interagency Agreement Disclosure.* When NCES contracts with a private firm, or enters into an agreement with another government agency or its contractor or both, for the purpose of collecting, collating, analyzing, aggregating, maintaining, appending, or otherwise refining records in this system, NCES may

release relevant records to the NCES contractor or to the other government agency or its contractor, consistent with NCES's authority for the for the collection of statistics at 20 U.S.C. 9544(b)(3)(A). The NCES contractor or other government agency or its contractor must agree to safeguards to protect the security and confidentiality of the records disclosed from this system, consistent with Section 183 of the ESRA (20 U.S.C. 9573).

(2) *Research Disclosure.* Where NCES determines that an individual or organization is qualified to carry out specific research, NCES may disclose information from the system of records to that researcher solely for the purpose of carrying out that research. NCES will only disclose directly personally identifiable respondent information to a researcher, upon the researcher's direct request, when such disclosure is relevant to the research, as determined by NCES. The researcher must agree to safeguards to protect the security and confidentiality of the records disclosed from this system, consistent with Section 183 of the ESRA (20 U.S.C. 9573). Furthermore, the researcher must agree to a restricted-use data licensing agreement that (among other things) requires: that the disclosed information be used only for statistical purposes; that the disclosed data cannot be redisclosed in identifiable form; that all work products that use the disclosed data must be submitted to NCES for disclosure review prior to sharing the work products with anyone not named in the data licensing agreement; and that NCES may periodically inspect the workspace approved in the restricted-use data licensing agreement.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are maintained in a database on NCES's or its contractors' or subcontractors' secure servers and in other secure electronic storage media. Directly personally identifiable respondent information, such as name and contact information, is stored separately from the rest of the data collected in this system. Principal Project Officers, Senior Officials from the Principal Researchers' institution or organization, and System Security Officers must execute IES Restricted-Use Data Security Plans (Security Plans) and follow the data access, storage, and security protocols set forth therein.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records in the location file are indexed by a unique number assigned to each individual, which can be cross-

referenced when needed with the separately stored direct personal identifiers. Records are retrieved by title of survey and the unique number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

The Department shall submit a retention and disposition schedule that covers the records contained in this system to the National Archives and Records Administration (NARA) for review. The records will not be destroyed until such time as NARA approves said schedule.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Contractors and subcontractors: Access to the records is limited to authorized personnel who are briefed regarding confidentiality of the data, are required to sign a written statement attesting to their understanding of the significance of the confidentiality requirement and penalties for non-compliance, and have received Department approval to hold a Public Trust position.

All physical access to the NCES, contractor, and subcontractor sites where this system of records is maintained, is controlled and monitored by security personnel who check each individual entering the buildings for his or her employee or visitor badge.

The computer systems employed offer a high degree of resistance to tampering and circumvention. Security systems limit data access to contract staff on a "need to know" basis, and control each individual user's ability to access and alter records within the system.

The NCES, contractor, and subcontractor employees who "maintain" (including collect, maintain, use, or disseminate) data in this system of records must comply with the requirements of the confidentiality standards under Section 183 of the ESRA (20 U.S.C. 9573).

Researchers: The Principal Project Officer(s) on a NCES-restricted-use data license and a Senior Official from the Principal Project Officer(s)' institution or organization must sign a legally binding agreement that transfers the responsibilities and penalties under Section 183 of the ESRA (20 U.S.C. 9573) to the researcher(s) and their institution or organization for a fixed period of time. The Principal Project Officer(s), Senior Official from the Principal Project Officer(s)' institution or organization, and a System Security Officer all must sign a Security Plan that identifies the location where the data will be stored and processed, security arrangements, and authorized data users

(if any) beyond the Principal Project Officer(s). Researchers, including all authorized data users besides the Principal Project Officer(s) on each license, must complete training on the confidential nature of the data, and are each required to sign a notarized written statement attesting to their understanding of the significance of the confidentiality requirement and penalties for non-compliance. At the end of the license period, the Principal Project Officer(s) must either return the data to NCES or destroy the data and complete and submit a witnessed certificate of destruction.
