

Resident killer whales (*Orcinus orca*) and opportunistically study other cetaceans in the inland and coastal waters of Washington. Up to 17 additional species of cetaceans may be targeted for research including the following ESA-listed species: blue (*Balaenoptera musculus*), fin (*B. physalus*), gray (Western North Pacific distinct population segment [DPS]; *Eschrichtius robustus*), humpback (Mexico and Central America DPS; *Megaptera novaeangliae*), North Pacific right (*Eubalaena japonica*), sei (*B. borealis*), and sperm (*Physeter macrocephalus*) whales. Researchers would conduct vessel surveys, including unmanned aircraft systems, for counts, photography, photo-identification, photogrammetry, video recording, observations, passive acoustic recording, collection of samples (sloughed skin, feces, and predation remains), and underwater photo/videography. Five species of pinnipeds, including endangered Steller sea lions (Western DPS; *Eumetopias jubatus*), may be harassed during research. See the application for numbers of animals requested by species and procedure.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically

excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: January 30, 2023.

Julia M. Harrison,
Chief, Permits and Conservation Division,
Office of Protected Resources, National
Marine Fisheries Service.

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The Assistant Regional Administrator for Sustainable Fisheries,

Greater Atlantic Region, NMFS, has made a preliminary determination that an Exempted Fishing Permit (EFP) application contains all of the required information and warrants further consideration. The EFP would allow federally permitted fishing vessels to fish outside fishery regulations in support of exempted fishing activities proposed by the applicant. Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed EFPs.

DATES: Comments must be received on or before February 17, 2023.

ADDRESSES: You may submit written comments by the following method:

- *Email:* nmfs.gar.efp@noaa.gov.

Include in the subject line “6-Inch Gillnet Mesh Exploratory Fishing.”

FOR FURTHER INFORMATION CONTACT: Spencer Talmage, Fishery Policy Analyst, *Spencer.Talmage@noaa.gov*, (978) 281-9232.

SUPPLEMENTARY INFORMATION: The applicant submitted a complete application for an EFP to conduct commercial fishing activities that the regulations would otherwise restrict. This EFP would exempt the participating vessels from the following Federal regulations:

TABLE 1—REQUESTED EXEMPTIONS

Citation	Regulation	Need for exemption
50 CFR 648.80(a)(3)(iv)(B)(1)	Minimum mesh size for Trip Gillnet Vessels in the Gulf of Maine.	Needed to deploy 6-inch gillnet gear in Gulf of Maine.

TABLE 2—PROJECT SUMMARY

Project title	6-Inch Gillnet Mesh Exploratory Fishing.
Applicant	Northeast Sector Services Network.
Project objectives	Evaluate the efficacy of smaller mesh gillnet for haddock, without increasing catch of cod.
Application date	November 22, 2022.
Project period	January 2023—May 31, 2023.
Project location	Gulf of Maine.
Number of vessels	1.
Number of trips	20–30.
Trip duration (days)	2–3.
Total number of days	40–90 days.
Gear type(s)	Gillnet, 6 inch (15.24-cm) mesh.
Number of tows or sets	20–30.
Duration of tows or sets	24 hours.

Project Narrative

The proposed EFP is a continuation of a project conducting exploratory fishing in the Gulf of Maine (GOM) that mimics the structure of the GOM Sink Gillnet Mesh Exemption originally approved for sectors from fishing years 2010 through

2012. In fishing year 2013, NMFS disapproved the exemption due to concerns regarding the status of the GOM haddock stock, which at the time was subject to overfishing and approaching an overfished condition. The proposed EFP would provide preliminary catch data to inform future

studies to test the feasibility of using the 6-inch (15.24-cm) gillnet gear to target haddock while minimizing catch of GOM cod.

From issuance to May 31, 2023, the participating vessel would conduct between 20 and 30 trips under the EFP in the GOM Regulated Mesh Area

during which it would make 20–30 hauls with 6-inch (15.24-cm) mesh gillnet gear. The maximum number of individual nets that could be deployed is 75. Gillnets would be set for a soak of up to 24 hours, and would be actively tended by the vessel (*i.e.*, the vessel would not leave the fishing grounds while nets are deployed).

A Northeast Fisheries at-sea monitor or observer would be deployed on all groundfish trips taken under the EFP. The participating vessel would use the Pre-Trip Notification System to identify groundfish trip taken under the EFP. Trips would be eligible for natural selection for observer coverage for either the Northeast Fisheries Observer Program or the At-Sea Monitoring program. Trips not naturally selected for observer coverage would not be reimbursable from Federal appropriations.

Allowable discards would be discarded at-sea, while all other species would be retained, landed, and processed per normal commercial fishing procedures. Monitors would document all discards of allocated sub-legal catch.

While on EFP trips, the vessel may also occasionally deploy a small amount of longline and 6.5-inch (16.51-cm) mesh gillnet gear, in order to generate catch composition data that could be used to compare the catchability of the 6-inch (15.24-cm) mesh gear with other gears used on a normal fishing trip. The gillnet gear would consist of 12 to 24 nets in a single string, while the longline gear would have between 1,000 and 2,400 hooks. All groundfish catch, including both discards and landings, would be deducted from the appropriate sector allocation.

If approved, the applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 30, 2023.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Marine Mammals; File No. 26919

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that the Georgia Department of Natural Resources, 2070 U.S. Highway 278 Southeast, Social Circle, GA 30025 (Responsible Party: Jonathan Ambrose) has applied in due form for a permit to conduct research on cetaceans.

DATES: Written, telefaxed, or email comments must be received on or before March 6, 2023.

ADDRESSES: The application and related documents are available for review by selecting “Records Open for Public Comment” from the “Features” box on the Applications and Permits for Protected Species (APPS) home page, <https://apps.nmfs.noaa.gov>, and then selecting File No. 26919 from the list of available applications. These documents are also available upon written request via email to NMFS.Pr1Comments@noaa.gov.

Written comments on this application should be submitted via email to NMFS.Pr1Comments@noaa.gov. Please include File No. 26919 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request via email to NMFS.Pr1Comments@noaa.gov. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Shasta McClenahan, Ph.D., or Carrie Hubard, (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

The applicant requests a 5-year permit to study endangered North Atlantic right whales (*Eubalaena glacialis*) to monitor the population and its habitat, identify and reduce human causes of

mortality and serious injury, and implement the recovery plan. Three species of non-listed cetaceans may be unintentionally harassed and opportunistically studied during research. Researchers would conduct surveys from vessels or aircraft (manned or unmanned) for counts, photography, photo-identification, photogrammetry, thermal imaging, video recording, observations, passive acoustic recording, tracking, underwater photo/videography, and biological sampling (exhaled air, feces, and skin and blubber biopsy). Marine mammal parts may be exported and imported for analysis. See the application for numbers of animals requested by species and procedure.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: January 30, 2023.
