

leveraged, and scaled across other HRSA funding opportunities.

- Enhanced evidence base for recommendations to promote and scale virtual care innovations focused on increasing health equity and specific to Health Center Program patients.

The assessment will include descriptive analyses of the data on grant recipient activities and performance, including analyses of trends over time. The analyses will inform recommendations for performance measures that HRSA could scale across the Health Center Program and across other grant programs like the OVC grant program.

The grant recipient activities related to implementation of novel models of virtual care, including aggregate data on patients served and the services they received, will be captured via monthly progress reports. A set of health center performance measures will be captured in a bi-annual progress report and will provide insight into health equity and

virtual care. Grant recipients will collect and report performance measures based on project goals and objectives that span four key population health and clinical domain areas, including (1) Increased Access to Care and Information; (2) Improve Clinical Quality and Health Outcomes; (3) Enhance Patient Care Coordination; and (4) Promote Health Equity.

Based on comments from OVC grant recipients, the average hours of burden per response for the biannual progress report has been increased to 55.9 hours from 48 hours as proposed in the 60-day notice. This new burden estimate accounts for the fact that performance measures in the biannual progress report have different levels of burden per response. For example, some measures required significant workflow changes or had more complexity. In addition, both the biannual progress and monthly progress reports were revised to include updated terms and definitions based on feedback collected

from OVC grant recipients during the public comment period.

Likely Respondents: Respondents will be the 29 health centers that received supplemental awards through the OVC grant program.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
OVC Grant Monthly Progress Report	29	12	348	2.0	696
OVC Grant Bi-Annual Progress Report	29	2	58	55.9	3,242
	29	406	3,938

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.
