

4. If applicable, the reason for any adverse termination of the family from a Federally assisted housing program.

This information is collected electronically from PHAs via HUD's EIV system. This information is used by HUD to create a national repository of families that owe a debt to a PHA and/or have been terminated from a federally assisted housing program. This national repository is available within the EIV

system for all PHAs to access during the time of application for rental assistance. PHAs are able to access this information to determine a family's suitability for rental assistance, and avoid providing limited Federal housing assistance to families who have previously been unable to comply with HUD program requirements. If this information is not collected, the Department is at risk of paying limited Federal dollars on behalf

of families who may not be eligible to receive rental housing assistance. Furthermore, if this information is not collected, the public will perceive that there are no consequences for a family's failure to comply with HUD program requirements.

*Respondents:* Public Housing Agencies.

**Abstract:** The Service has overall Federal responsibility for managing the Nation’s fish and wildlife resources. One of the Service’s priorities is to provide the public with wildlife-based

outdoor recreation opportunities on National Wildlife Refuges, National Fish Hatcheries, and other Service lands (collectively, refuges). These outdoor recreation opportunities include hunting, which is an important opportunity for people to connect with nature, harvest food, and assist the Service in managing wildlife populations.

The National Wildlife Refuge System Administration Act, as amended by the National Wildlife Refuge System Improvement Act (The Act; 16 U.S.C. 668dd *et seq.*) stipulates that refuges undergo a comprehensive conservation planning process that, among other things, must look at the compatibility of wildlife-dependent recreation (including hunting) on refuges. We will use the information from the proposed survey effort to inform planning on refuges as mandated by The Act.

Hunting on refuges is regulated by both State and Federal laws as well as through refuge-specific regulations. These refuge-specific regulations are made in accordance with hunt plans required to be developed for each refuge. These hunt plans outline things such as refuge-specific bag limits, season dates, areas open and closed to hunting, allowed hunting time, etc. The hunt plans are an important tool that refuges use to manage harvest, safety, and visitor experience.

Creating hunt plans relies on sound biological and social data. Understanding hunter experience, preference, and harvest helps refuge managers and planners tailor hunt plans to suit biological and visitor objectives and maintain a safe environment for hunters and non-hunting visitors.

We consulted with regional leadership staff from the Service’s Northeast Region and refuge staff in the development of the proposed surveys. This interdisciplinary team identified data gaps needed to help inform future hunt plan development, identify safety concerns that need attention, and better understand hunter preference in order to improve visitor experience. The region, in consultation with the Service’s Human Dimension Branch, developed the surveys. This effort identified critical data necessary for the management of hunting on refuges and revising and creating future hunt plans.

This information collection is for two survey instruments:

- *Form 3-2557, “Hunter Satisfaction Survey”*—The survey’s purpose is to learn more about big game, small game, migratory bird, and upland game hunters and their overall experience hunting on national wildlife refuges and hatcheries. The survey includes
