

Inspection and Check Out (SICO); and other related elements of logistical and program support.

(iv) *Military Department*: Army (TH-B-WHL, TH-B-WHI).

(v) *Prior Related Cases, if any*: None.

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid*: None.

(vii) *Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold*: See Attached Annex.

(viii) *Date Report Delivered to Congress*: July 30, 2021.

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Thailand—Javelin Missiles

The Government of Thailand has requested to buy three hundred (300) Javelin FGM-148 Missiles; and fifty (50) Javelin Command Launch Units (CLU). Also included are Enhanced Producibility Basic Skills Trainers; missile simulation rounds; Security Assistance Management Directorate (SAMDM) Technical Assistance; Tactical Aviation and Ground Munitions (TAGM) Project Office Technical Assistance; contractor lifecycle support; spares manuals; batteries/chargers; gunner training; ammunition officer training; OCONUS Modified Level 2 Maintenance Training; System Inspection and Check Out (SICO); and other related elements of logistical and program support. The total estimated cost is \$83.5 million.

This proposed sale will contribute to the foreign policy and national security objectives of the United States by improving the security of a Major Non-NATO Ally in Southeast Asia. The Javelin Weapon System will replace the obsolete 106mm Recoilless Rifles that the Royal Thai Army (RTA) acquired as part of the Military Assistance Program (MAP) from the Vietnam era. This proposed sale will allow the RTA to modernize their light anti-tank capability and maintain its current force posture, as well as enhance interoperability with the U.S. during operations and training exercises. Thailand is a strategic partner committed to contributing to regional security.

The proposed sale will improve Thailand's capability to meet current and future threats by improving Thailand's long-term defense capacity to defend its sovereignty and territorial integrity. Thailand will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractors will be Raytheon/Lockheed Martin Javelin Joint Venture of Orlando, Florida, and Tucson, Arizona. Offsets have not been included. Any offset agreements will be defined in negotiations between the purchaser and the contractor(s).

Implementation of this proposed sale will not require the assignment of U.S. Government or contractor representatives to Thailand.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 21–53

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology*:

1. The Javelin Weapon System is a medium-range, man portable, shoulder-launched, fire and forget, anti-tank system for infantry, scouts, and combat engineers. It may also be mounted on a variety of platforms including vehicles, aircraft and watercraft. The system weighs 49.5 pounds and has a maximum range in excess of 2,500 meters. The system is highly lethal against tanks and other systems with conventional and reactive armors. The system possesses a secondary capability against bunkers.

2. Javelin's key technical feature is the use of fire-and-forget technology, which allows the gunner to fire and immediately relocate or take cover. Additional special features are the top attack and/or direct fire modes, an advanced tandem warhead and imaging infrared seeker, target lock-on before launch, and soft launch from enclosures or covered fighting positions. The Javelin missile also has a minimum smoke motor, thus decreasing its detection on the battlefield.

3. The Javelin Weapon System is comprised of two major tactical components, which are a reusable Command Launch Unit (CLU) and a round contained in a disposable launch tube assembly. The CLU incorporates an integrated day-night sight that provides a target engagement capability in adverse weather and countermeasure environments. The CLU may also be used in a stand-alone mode for battlefield surveillance and target detection. The CLU's thermal sight is a second generation Forward Looking Infrared (FLIR) sensor. To facilitate initial loading and subsequent updating of software, all on-board missile software is uploaded via the CLU after mating and prior to launch.

4. The missile is autonomously guided to the target using an imaging infrared seeker and adaptive correlation tracking algorithms. This allows the gunner to take cover or reload and engage another target after firing a missile. The missile has an advanced tandem warhead and can be used in either the top attack or direct fire modes (for target undercover). An onboard flight computer guides the missile to the selected target.

5. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

6. If a technologically advanced adversary were to obtain knowledge of the specific hardware or software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

7. A determination has been made that Thailand can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

8. All defense articles and services listed in this transmittal are authorized for release and export to the Government of Thailand.

BILLING CODE 5001-06-C

Transmittal No. 21-37

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as Amended

(i) *Prospective Purchaser:* Government of India

(ii) *Total Estimated Value:*

Major Defense Equipment * ..	\$ 27 million.
Other	\$ 55 million.

Total	\$ 82 million.
-------------	----------------

Funding Source: National Funds.

(iii) *Description and Quantity or Quantities of Articles or Services Under Consideration for Purchase:*

Major Defense Equipment (MDE):

One (1) Harpoon Joint Common Test Set (JCTS)

Non-MDE:

Also included is one (1) Harpoon Intermediate Level maintenance station; spare and repair parts, support, and test equipment; publications and technical documentation; personnel training; U.S. Government and contractor technical, engineering, and logistics support services; and other related elements of logistics and program support.

(iv) *Military Department:* Navy (IN-P-LAX).

(v) *Prior Related Cases, if any:* IN-P-AAL, IN-P-AAP, IN-P-ABC.

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None.

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex.

(viii) *Date Report Delivered to Congress:* August 2, 2021.

*As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

India—Harpoon Joint Common Test Set (JCTS)

The Government of India has requested to buy one (1) Harpoon Joint Common Test Set (JCTS). Also included is one (1) Harpoon Intermediate Level maintenance station; spare and repair parts, support, and test equipment; publications and technical documentation; personnel training; U.S. Government and contractor technical, engineering, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$82 million.

This proposed sale will support the foreign policy and national security of

the United States by helping to strengthen the U.S.-Indian strategic relationship and to improve the security of a major defensive partner, which continues to be an important force for political stability, peace, and economic progress in the Indo-Pacific and South Asia region.

This proposed sale will improve India's capability to meet current and future threats by providing India with flexible and efficient Harpoon missile maintenance capabilities to ensure maximum force readiness. India will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be The Boeing Company, St. Louis, MO. There are no known offset agreements proposed in connection with this potential sale. Any offset agreement required by India will be defined in negotiations between the purchaser and the contractor(s).

Implementation of this proposed sale will require the assignment of one (1) U.S. contractor representative to India for a duration of one (1) year to support technical reviews, support, and oversight.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 21-37

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vii

(vii) *Sensitivity of Technology:*

1. The Harpoon Joint Common Test Set (JCTS) is used to maintain all configurations of the Harpoon missile. India seeks to establish a Harpoon Intermediate Level Weapon Station via an acquisition of a JCTS that can test their current inventory, as well as up to a BLK IJU Harpoon Missile. The elements listed below being conveyed by the proposed sale are considered sensitive. These elements are used to test and verify the ability of the Harpoon missile to engage hostile targets under a wide range of operations, tactical, and environmental conditions:

- The Radar Seeker test capability
- The Radar Altimeter test capability
- The GPS/INS System test capability
- Operational Flight Program Software

e. Missile operational characteristics and performance data

2. The highest level of classification of defense articles, components, and services included in this potential sale is CONFIDENTIAL.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that India can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of India.
