

conservation and management of marine fishery resources within the Exclusive Economic Zone (EEZ) of the United States through NOAA/NMFS. NMFS Alaska Region manages the EEZ off Alaska under the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (BSAI FMP) and the Fishery Management Plan for Groundfish of the Gulf of Alaska. The North Pacific Fishery Management Council recommended A80 to the BSAI FMP in June 2006 (72 FR 52668, September 14, 2007). A80 allocates several Bering Sea and Aleutian Islands (BSAI) nonpollock trawl groundfish species among trawl fishery sectors, established a limited access privilege program (LAPP), and facilitated the formation of harvesting cooperatives in the non-American Fisheries Act (non-AFA) trawl catcher/processor sector. More information on the A80 Program is provided on the NMFS Alaska Region website at <https://www.fisheries.noaa.gov/alaska/sustainable-fisheries/bering-sea-andaleutian-islands-amendment-80-groundfish-trawl-fishery>.

This collection contains applications used by an individual or business entity to apply for A80 quota share, used by A80 quota shareholders to transfer A80 quota share and to apply for an A80 limited access fishery permit, used by A80 cooperatives to apply for cooperative quota and transfer cooperative quota, used by cooperatives or Community Development Quota groups to exchange community quota for one eligible flatfish species with community quota of a different eligible flatfish species, and used by A80 vessel owners to replace their vessels. This information collection also contains the appeals process for an application that is denied.

The type of information collected includes information on the applicants, transferors, transferees, permits, vessels, quota share, cooperative quota, and flatfish harvest quota.

NMFS uses this information to establish eligibility to receive A80 quota share, cooperative quota, and permits; transfer and assign harvest quota; replace vessels used in the A80 Program; determine A80 species initial total allowable catch assignments; determine which vessels must be tracked for catch accounting; and review ownership and control information to ensure that quota share and cooperative quota use caps are not exceeded.
