SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Utilization of the Novel ECC Eagle External Condom Catheter System; OMB Control Number 0720–ECC.

Needs and Uses: There are numerous methods to manage urinary incontinence, from pads/diapers to condom catheters to invasive urethral foley catheters. Pads or diapers can lead to skin irritation due to their occlusive barriers which can leave skin moist and lead to breakdown. Current condom catheters can be difficult to size and cause skin breakdown and infections. They can also fall off in patients with a large suprapubic fat pad and a shorter penis. Foley catheters can be uncomfortable and can lead to urinary tract infections. Thus, there is a need for a better way to manage urinary incontinence in men. The ECC Eagle is a novel design for a condom catheter that is intended to be more comfortable and secure than current models. We need to ask patients questions on their experience with the ECC Eagle, the degree of urinary symptoms they experience and the impact this has on their lives. This information is vital to the development of this product.

Affected Public: Individuals and households.

ECC Eagle Patient Satisfaction Questionnaire

Annual Burden Hours: 0.8.

PROMIS General Life Satisfaction Questionnaire

Average Burden per Response: 5 minutes.

The respondents will be adult men with stress urinary incontinence. They will be responding to this information collection because this is required if they want to trial the novel ECC Eagle

external condom catheter. Each collection instrument will be done electronically via Qualtrics, a secure web-based survey platform. Patients will access this via their smartphone. The results will automatically be received via Qualtrics when they submit the responses.

Participants in the ECC Eagle trial will get to keep the external condom catheter they used for the study. There is no other gift, payment, or incentive to participate.
