Human remains representing, at minimum, nine individuals were removed from Richmond, VA. In February of 1975, as part of the installation of Interstate 95 through the

City of Richmond, archeologists from Virginia Commonwealth University's Department of Archaeology excavated two burial features (Burial 1 and Burial 2). Following the excavation, these human remains were transported to Virginia Commonwealth University. In January of 2019, a review of the collection inventory identified the excavated human remains and archeological materials. The University's Department of Forensic Science has determined that these nine individuals are Native American ranging in age from 34-38 weeks to adult. Based on pottery sherd analysis, these human remains are dated to the Late Woodland period (circa A.D. 900-1600).
