

a revised ICR that includes measures for RCORP’s new MAT Access and Behavioral Health Care Support grants.

For this program, performance measures were developed to provide data on each RCORP initiative and enable HRSA to provide aggregate program data required by Congress under the Government Performance and Results Act of 1993. These measures cover the principal topic areas of interest to the Federal Office of Rural Health Policy, including: (a) provision of, and referral to, rural behavioral health care services, including SUD prevention, treatment and recovery support services; (b) behavioral health care, including SUD prevention, treatment, and recovery, process and outcomes; (c) education of health care

providers and community members; (d) emerging trends in rural behavioral health care needs and areas of concern; and (e) consortium strength and sustainability. All measures will speak to the Federal Office of Rural Health Policy’s progress toward meeting the goals set.

Likely Respondents: The respondents will be recipients of the RCORP grants.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and

maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

The only revisions to the approved information collection are the addition of measures for the RCORP-MAT Access and RCORP-Behavioral Health Care Support grants. Since the performance measures for these grants are substantially different than other RCORP grants, HRSA calculated burden hours separately.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent (annually)	Total responses	Average burden per response (in hours)	Total burden hours
Rural Communities Opioid Response Program—Implementation/Neonatal Abstinence Syndrome	290	2	580	1.24	719.20
Rural Communities Opioid Response Program—Psychostimulant Support	15	1	15	1.30	19.50
Rural Communities Opioid Response Program—MAT Access—***NEW***	11	1	11	1.95	21.45
Rural Communities Opioid Response Program—Behavioral Health Care Support—***NEW***	58	1	58	2.02	117.16
Total	374	664	877.31

HRSA specifically requests comments on: (1) the necessity and utility of the proposed information collection for the proper performance of the agency’s functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.
