

(viii) *Date Report Delivered to Congress*: August 25, 2021

*As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Australia—Defense Services Related to Future Standard Missile Production

The Government of Australia has requested to buy defense services related to the future purchase of Standard Missile 6 Block I (SM–6) and Standard Missile 2 Block IIIC (SM–2 IIIC) missiles. These services include development; engineering, integration, and testing (EI&T); obsolescence engineering activities required to ensure readiness; U.S. Government and contractor engineering/technical assistance, and related studies and analysis support; technical and logistics support services; and other related elements of program and logistical support. The total estimated value is \$350 million.

This proposed sale will support the foreign policy and national security objectives of the United States. Australia is one of our most important allies in the Western Pacific. Australia is strategically positioned to contribute significantly to ensuring peace and economic stability in the region. It is vital to the U.S. national interest to assist our ally in developing and maintaining a strong and ready self-defense capability.

The proposed sale will support the readiness and future sale of vital anti-air warfare capability that can be deployed from Australia's newest Hunter-Class Destroyers equipped with the latest AEGIS Combat Systems. The purchase of Standard Missile 6 Block I (SM–6) and Standard Missile 2 Block IIIC (SM–2 IIIC) missiles is currently included in Australia's procurement roadmap and will improve their ability to operate alongside U.S. and Allied naval forces against the full spectrum of naval threats. Australia will have no difficulty absorbing these defense services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal U.S. contractor will be Raytheon Missiles and Defense (RMD), Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of the proposed sale will require U.S. Government and contractor personnel to visit Australia on a temporary basis in conjunction with program technical oversight and support requirements, including program and technical reviews.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 21–55

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology*:

1. The proposed sale will result in the transfer of sensitive and classified technical data related to obsolescence engineering, integration, and test activities required to ensure readiness for the future procurement of Standard Missile 6 Block I (SM–6) and Standard Missile 2 Block IIIC (SM–2 IIIC) missiles. No SM–6 Blk I or SM–2 IIIC hardware or software will be transferred under this proposed sale. Australia currently employs SM–2 Block IIIA and IIIB on Royal Australian Navy (RAN) AEGIS surface combatants, and has been afforded access to similar technical information for these delivered systems.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or

be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the Government of Australia can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal are authorized for release and export to the Government of Australia.

The Honorable Nancy Pelosi
Speaker of the House
U.S. House of Representatives
H-209, The Capitol
Washington, DC 20515

Dear Madam Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 21-54 concerning the Air Force's proposed Letter(s) of Offer and Acceptance to the Republic of Korea for defense articles and services estimated to cost \$258 million. After this letter is delivered to your office, we plan to issue a news release to notify the public of this proposed sale.

Sincerely,

Jedidiah P. Royal
Deputy Director

BILLING CODE 5001-06-C

Transmittal No. 21-54

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Republic of Korea

Total Estimated Value:

| | |
|------------------------------|----------------------|
| Major Defense Equipment * .. | \$251 million |
| Other | \$ 7 million |
| TOTAL | \$258 million |

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

Major Defense Equipment (MDE):

Three thousand nine hundred fifty-three (3,953) Joint Direct Attack Munition (JDAM) Guidance Kits, KMU-556 for GBU-31
 One thousand nine hundred eighty-one (1,981) JDAM Guidance Kits, KMU-557 for GBU-31, GBU-56
 One thousand one hundred seventy-

nine (1,179) JDAM Guidance Kits, KMU-572 for GBU-38
 One thousand seven hundred fifty-five (1,755) FMU-139 Fuze Systems

Non-MDE:

Also included are DSU-42/B Detectors, Laser Illuminated Target for GBU-56; weapon spare parts, components and accessories; weapons training aids, devices, and spare parts; U.S. Government and contractor engineering, technical assistance, and logistical support

services; and other related elements of logistical and program support.

(iv) *Military Department*: Air Force (KS-D-YAW, KS-D-YAX, KS-D-YAY)

(v) *Prior Related Cases, if any*: None

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid*: None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold*: See Attached Annex

(viii) *Date Report Delivered to Congress*: August 25, 2021

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Korea—Precision Guided Munitions

The Republic of Korea has requested to buy three thousand nine hundred fifty-three (3,953) Joint Direct Attack Munition (JDAM) Guidance Kits, KMU-556 for GBU-31; one thousand nine hundred eighty-one (1,981) JDAM Guidance Kits, KMU-557 for GBU-31, GBU-56; one thousand one hundred seventy-nine (1,179) JDAM Guidance Kits, KMU-572 for GBU-38; and one thousand seven hundred fifty-five (1,755) FMU-139 Fuze Systems. Also included are DSU-42/B Detectors, Laser Illuminated Target for GBU-56; weapon spare parts, components and accessories; weapons training aids, devices, and spare parts; U.S. Government and contractor engineering, technical assistance, and logistical support services; and other related elements of logistical and program support. The estimated total cost is \$258 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by helping to improve the security of a Major Non-NATO ally that continues to be an important force for political stability, peace, and economic progress in the Indo-Pacific region.

The proposed sale will improve the Republic of Korea's capability to meet current and future threats by increasing available stores of munitions on the Korean Peninsula in support of Alliance Operations Plans (OPLANs), as well as to fulfill conditions outlined by the Condition-Based Operational Control (OPCON) Transition Plan. The Republic of Korea will have no difficulty absorbing these articles into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Boeing Corporation, St Louis, Missouri. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to the Republic of Korea.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 21-54

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology*:

1. The Joint Direct Attack Munition (JDAM) is a guidance kit that converts existing unguided free-fall bombs into an accurate, adverse weather "smart" munition. The Guidance Set consists of a Tail Kit, which contains the Inertial Navigation System (INS) and a Global Positioning System (GPS), a set of Aerosurfaces and an umbilical cover, which allows the JDAM to improve the accuracy of unguided, General Purpose bombs. The JDAM weapon can be delivered from modest standoff ranges at high or low altitudes against a variety of land and surface targets during the day or night. The JDAM is capable of receiving target coordinates via preplanned mission data from the delivery aircraft, by onboard aircraft sensors (*i.e.*, FLIR, Radar, etc.) during captive carry, or from a third-party source via manual or automated aircrew cockpit entry. The Guidance Set, when combined with a warhead and appropriate fuze, forms a JDAM Guided Bomb Unit (GBU).

(a) The KMU-572 is the tail kit for a GBU-38 500LB JDAM.

(b) The KMU-556 is the tail kit for a GBU-31 2,000LB Mk-84 (General Purpose bomb body) JDAM.

(c) The KMU-557 is the tail kit for a GBU-31/-56 2,000LB BLU-109 (General Purpose bomb body) JDAM.

2. The Laser JDAM (GBU-56) is a 2,000LB JDAM that incorporates all the capabilities of the JDAM guidance tail kit and adds a DSU-42/B precision laser guidance set. The DSU-42/B sensor gives the weapon system an optional semi-active laser seeker. The addition of the DSU-42/B laser sensor combined with additional cabling and mounting hardware turns a GBU-31 JDAM into a GBU-56 LJDAM. The DSU-42/B consists of a laser spot tracker, a cable connecting the DSU-42/B to the basic JDAM guidance set, a cable cover, cable cover tie-down straps, modified tail kit door and wiring harness, and associated modified JDAM software that incorporates navigation and guidance

flight software to support both LJDAM and standard JDAM missions. The DSU-42/B adds the flexibility to strike targets of opportunity, including mobile and moving targets, to an already accurate adverse weather GPS/INS guided JDAM.

3. The Joint Programmable Fuze (JPF) FMU-139D/B is a multi-delay, multi-arm and proximity sensor compatible with general purpose blast, frag and hardened-target penetrator weapons. The JPF settings are cockpit selectable in flight when used numerous precision-guided weapons. It can interface with the following weapons: GBU-31, GBU-38, and GBU-56.

4. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

5. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

6. A determination has been made that the Republic of Korea can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

7. All defense articles and services listed in this transmittal have been authorized for release and export to the Republic of Korea.
