

Commission's estimates for its analysis. For select municipal dealers who only trade municipal securities and clear themselves, the one-time upfront costs for system upgrades and policy and procedure revision would be approximately \$874,000 per firm for dealers serving institutional investors only and \$1,276,000 per firm for dealers also serving retail investors. This calculation is based on the Commission's estimate of the one-time upfront cost of \$8,740,000 per firm for broker-dealers that serve institutional investors and \$12,760,000 per firm for broker-dealers that also serve retail investors when including all securities, other than an exempted security (a government security, a municipal security, commercial paper, bankers' acceptances, or commercial bills).³⁵ The MSRB believes these select dealers may choose to use a third-party clearing firm if the cost for outsourcing the clearing practice is lower than the estimated costs above. Finally, the MSRB also believes that dealers would incur minimal ongoing direct compliance costs after the initial transition to a T+1 standard settlement cycle.³⁶

In summary, the MSRB believes that the industry is equipped with readily available technology for the transition to a T+1 settlement cycle, and the changes are necessary or appropriate in furtherance of the purposes of the Exchange Act. The MSRB believes the proposed rule change would promote regulatory consistency and market efficiency by having regular-way settlement for municipal securities transactions consistent with the standard settlement for other security classes and harmonized with Amended SEC Rule 15c6-1.³⁷ As the proposed rule change would be applied equally to all registered dealers transacting in municipal securities, the MSRB believes that the proposed rule change would not impose any additional burdens on competition, that are not necessary or appropriate in furtherance of the purposes of the Exchange Act.

³⁵ *Id.* The MSRB's internal analysis assumes a cost saving of 90% for the one-time upfront cost for municipal securities only, as opposed to many other securities, such as equities, corporate bonds, asset-backed securities, mortgage-backed securities, and stock options, etc., accounting for some fixed costs when working on a single security product. In addition, the MSRB's internal analysis assumes that dealers who trade municipal securities only and self-clear are smaller in size than a typical broker-dealer in the SEC's estimate.
