Cultural Affiliation

The cultural items in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: anthropological, archeological, geographical, historical, and expert opinion.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, the Robert S. Peabody Institute of Archaeology has determined that:

- Pursuant to 25 U.S.C. 3001(3)(B), the 42 cultural items described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony and are believed, by a preponderance of the evidence, to have been removed from specific burial sites of Native American individuals.
- Pursuant to 25 U.S.C. 3001(3)(D), the 42 cultural items described above have ongoing historical, traditional, or cultural importance central to the Native American group or culture itself, rather than property owned by an individual.
- Pursuant to 25 U.S.C. 3001(2) there is a relationship of shared group identity that can be reasonably traced between the cultural items and The Muscogee (Creek) Nation.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

repatriation of the cultural items are considered a single request and not competing requests. The Robert S. Peabody Institute of Archaeology is responsible for sending a copy of this notice to the Indian Tribe identified in this notice.

In 1967, 362 associated funerary objects were removed from the Burns Site (8BR85) (also known as Burns Mound, Burns Place, Burnham's Place, and Burnham's Mound) in Brevard County, FL. These objects were removed from the surface of the burial mound and the immediate ground surface. No human remains were removed from this site. The objects were curated at the Florida Museum of Natural History (FLMNH) in Gainesville, Florida. The 362 associated funerary objects are one St. Johns Incised Body potsherd; four St. Johns Bold Stamped body potsherds; one St. Johns Exterior Check Stamp/Interior scored potsherd; four St. Johns Scored potsherds; 49 St. Johns Check Stamp potsherds; 52 St. Johns Plain potsherds; 66 Sandy St. Johns Plain potsherds; 184 Sand-Tempered Plain potsherds; and one Busycon sp. (shell) columella tool.

At an unknown date, one associated funerary object was removed from the Burns Site (8BR85) in Brevard County, FL. In 1950, the associated funerary object was donated to the FLMNH by the property owner, and in August of 2022, FLMNH transferred control of the object to SLD 45 USSF. The one associated funerary object is a potsherd (FLMNH Accession Number 2538).

Holmes Mound Site (8BR86)

In 1967, human remains representing, at minimum, three individuals were removed from the Holmes Mound Site (8BR86) in Brevard County, FL, by a University of Florida graduate student. These human remains were collected from the ground surface. Both the human skeletal remains and associated funerary objects were curated at FLMNH (FLMNH Accession Number 4595, Catalog Number 103726HR) before being transferred to SLD 45 USSF. The individual who collected the human remains and funerary objects stated that the site had been significantly disturbed by construction and that the items had been scattered over a large area of the site. The human remains—seven cranial fragments, four pelvic fragments, three femoral head fragments, one calcaneus, one clavicle, 17 long bone shaft fragments, and one bag of unidentifiable bone fragments—belong to two adults and one subadult. No known individuals were identified. The six associated funerary objects are two St. Johns Plain potsherds, two Sand-Tempered Plain potsherds, one Sandy

St. Johns potsherd, and one *Busycon* sp. (shell) hammer/tool.
