SUPPLEMENTARY INFORMATION: We, the Fish and Wildlife Service (Service), announce receipt of an application from James Bruckmann (applicant) for an incidental take permit (ITP) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The applicant requests the ITP to take the federally endangered Alabama beach mouse (ABM; *Peromyscus polionotus ammobates*) incidental to the construction of three single-family homes (project) in the City of Orange Beach, Baldwin County, Alabama. We request public comment on the application, which includes the applicant's habitat conservation plan (HCP), and on the Service's preliminary determination that this proposed ITP qualifies as "low effect," and may qualify for a categorical exclusion pursuant to the Council on Environmental Quality's National Environmental Policy Act (NEPA) regulations (40 CFR 1501.4), the Department of the Interior's (DOI) NEPA regulations (43 CFR 46), and the DOI's Departmental Manual (516 DM 8.5(C)(2)). To make this preliminary determination, we prepared a draft environmental action statement and low-effect screening form, both of which are also available for public review.

Proposed Project

The applicant requests a 30-year ITP to take ABM by converting approximately 0.319 acre (ac) of occupied ABM foraging and sheltering habitat incidental to the construction of three single-family homes located on three parcels totaling 2.79 ac in Baldwin County, Alabama. On the largest parcel, there was a previous single-family home that was destroyed in 2004 by Hurricane Ivan. The remaining portion of habitat on the lot (2.47 ac) will be protected and maintained to continue to provide habitat for the ABM. Minimization and mitigation measures include pre-construction trapping, relocation, annual monitoring, management, and reporting efforts. Habitat enhancement will occur on areas in need through augmentation of natural processes, including sand fencing. The applicant
