

Title of Collection: Evaluation of Strategies to Address Unfinished Learning in Math (ReSolve Math Study).

OMB Control Number: 1850–NEW.

Type of Review: New ICR.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 12,640.

Total Estimated Number of Annual Burden Hours: 2,559.

Abstract: The COVID–19 pandemic led to substantial unfinished learning in math and an important debate about how best to address it. Traditionally, policymakers and educators have advocated a “broad foundation skill building” approach, but an alternative “just-in-time skill building” approach has received more attention recently, including in the U.S. Department of Education’s COVID–19 Handbook. But there is limited evidence comparing these approaches. This evaluation will examine the effectiveness of adaptive technology products that deliver these two catch-up strategies in elementary schools, where teachers often struggle with how to teach math well and the benefits of using technology supports are understudied. The findings will provide valuable evidence, especially for low-performing schools identified under the Every Student Succeeds Act and their most underserved students. This package requests approval for data collection activities to conduct the evaluation.
