Abstract: The U.S. Department of Education is supporting the development and evaluation of a toolkit that supports the implementation of effective grade 6 fractions instruction based on the evidence-based recommendations in the Developing Effective Fractions Instruction for Kindergarten Through 8th Grade practice guide. The evaluation will rigorously test the efficacy of the toolkit in improving teacher self-efficacy and practices for fraction computation and rate and ratio instruction as well as student learning outcomes in grade 6 mathematics. The evaluation will use a blocked randomized controlled trial design in which schools within each district or within each block of similar schools will be randomly assigned to receive the toolkit. The evaluation will be conducted in 40 Illinois schools during the 2024/25 school year.

The evaluation will focus on measuring the toolkit’s impact on three key outcomes: teacher self-efficacy for fraction computation and rate and ratio instruction, classroom practice for fraction computation and rate and ratio instruction, and students’ ability to solve fraction computation and rate and ratio problems.

In addition to collecting data to measure teacher and student outcomes, the evaluation team will collect data to document the implementation of the

toolkit in treatment schools and the service contrast between treatment and control schools and to describe the characteristics of participating schools, teachers, and students at baseline.

The evaluation will produce a publicly available report that summarizes evaluation findings. The findings from the evaluation will inform further refinement of the toolkit, to be released to the public after the evaluation.
