Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection as described below. This is a proposed extension of the ICR, which is currently approved through January 31, 2024. EPA will consider the

comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: The Responsible Appliance Disposal Program (RAD) is a voluntary partnership program sponsored by the Environmental Protection Agency (EPA) that reduces emissions of ozone-depleting substances (ODS) and their substitutes, including hydrofluorocarbons (HFCs), that can be attributed to improper disposal of appliances. Appliances can contain ODS or HFC refrigerants and foams as well as universal wastes such as mercury, used oil, and polychlorinated biphenyls (PCB). Federal law requires refrigerant recovery and proper management of universal waste but does not require the recovery of appliance foam. Foam blowing agents and refrigerants in appliances may also have high ozone-depletion and/or global warming potentials. The RAD program works with utilities, retailers, manufacturers, federal agencies/states/municipalities, waste removal service providers, affiliates, and others to dispose of appliances using best environmental practices.

Form numbers: 5900–481; 5900–482.

Respondents/affected entities: The following is a list of North American Industry Classification System (NAICS) codes for organizations potentially affected by the information requirements covered under this ICR are Utilities (2211), Manufacturers (3352), Retailers (449210), federal agencies/states/municipalities (9924110), and Waste Removal Service Providers (56211).

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 52 (over three years).

Frequency of response: Annual, and when desired.

Total estimated burden: 292 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$43,702 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in estimates: There is no change to the total estimated respondent burden compared with the 292 hours for the ICR currently approved by OMB. While the total number of respondents increased, the number of expected new Partners decreased. Therefore, the increase in burden associated with existing Partner activities is offset by the

decrease in burden associated with new Partner activities.

Cynthia A. Newberg,
Director, Stratospheric Protection Division.
