k. *Description of Request:* The licensee requests Commission approval for a temporary variance of the minimum powerhouse flow and reservoir elevation requirements outlined in license articles 403 and 404. The purpose of the variance request is to accommodate controls upgrade and minor maintenance at the Forestville powerhouse (No. 2 Development), scheduled to take place for a duration of 6-10 weeks in June-July 2023. To facilitate the controls upgrade, the licensee plans to take both hydro units offline. Prior to taking the hydro units offline, the licensee would gradually reduce the powerhouse flows¹ to allow the reservoir elevation to exceed the maximum allowable limit (771.0 feet), and overflow the spillway² to prevent areas within the river channel from drying up before suspending the powerhouse flows.

For the duration of the planned upgrades, the licensee would provide flows³ from the spillway to the river by allowing the reservoir elevation to exceed the spillway crest elevation of 771.4 feet. Once the project upgrades are complete, the licensee would place the hydro units online and lower the reservoir level to meet the license requirements. The licensee would work closely with the relevant resource agencies to prevent any adverse environmental effects from occurring

¹ 40 cubic feet per second.

² The overflow spillway has a crest elevation of 771.4 feet.

³ The flows would be run of the river.

prior to, during, and after the temporary variance.
