

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by July 10, 2023 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it

displays a currently valid OMB control number.

Animal and Plant Health Inspection Service

Title: Customer Service Survey Project.

OMB Control Number: 0579–0334.

Summary of Collection: The Animal Health Protection Act of 2002 (7 U.S.C. 8301, *et seq.*), authorizes the Secretary of the U.S. Department of Agriculture to prevent, control and eliminate domestic diseases such as tuberculosis and brucellosis and to take actions to prevent and to manage foreign animal diseases such as hog cholera, foot-and-mouth disease. The Veterinary Services (VS) program of the Animal and Plant Health Inspection Service (APHIS), USDA, carries out this work. This information collection solicits the beliefs and opinions of persons who use VS services and products. The survey is required to solicit information from the general public who utilize the business services and animal programs administered by the USDA, APHIS, and VS.

Need and Use of the Information: The data collected from the survey will provide the local Area Office Manager with a general view of the public's perception of customer service and indicate problems which can be addressed locally. The survey will also provide feedback from the public on recommendations to improve upon customer service and provide a vehicle in which questions can be asked about VS to educate the public.

Description of Respondents: Business or other for-profit; Farms; Individuals or households; Not-for-profit institutions; State, Local or Tribal Government.

Number of Respondents: 15,050.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 800.

Ruth Brown,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

[Docket Number: USDA–2023–0007]

Notice of Request for Public Comment on 2023 Update to Technical Guidelines for Quantifying Greenhouse Gas (GHG) Emissions and Carbon Sequestration at the Entity-Scale for Agriculture and Forestry

AGENCY: Office of the Chief Economist, U.S. Department of Agriculture.

ACTION: Request for public comment.

SUMMARY: The U.S. Department of Agriculture (USDA) invites public comment on the 2023 update to *Quantifying Greenhouse Gas Fluxes in Agriculture and Forestry: Methods for Entity-Scale Inventory*, Technical Bulletin Number 1939, Office of the Chief Economist, USDA, Washington, DC. This report, prepared in part to meet requirements of section 2709 of the Food, Conservation, and Energy Act of 2008, provides methods to quantify entity-scale greenhouse gas (GHG) emissions from the agriculture and forestry sectors. The updates to this report were drafted by more than 60 authors, including USDA scientists, university researchers, and experts from non-governmental organizations and research institutions. This update adds new methods, improves existing methods where appropriate, and enhances the usability of the report. Comments received under this notice will be used to further refine the update to this report in preparation for publication as a USDA Technical Bulletin. Comments submitted will help USDA to ensure the new and updated quantification methods reflect the state of the science. A series of questions have been provided in the **SUPPLEMENTARY INFORMATION** section below to aid review. When submitting responses, please annotate comments using the report section number designations.

DATES: Interested persons are invited to submit comments on or before 11:59 p.m. Eastern Time July 10, 2023. Comments received after the posted deadline may not be considered, regardless of postmark.

ADDRESSES: Comments submitted in response to this notice may be submitted online Via the Federal eRulemaking Portal. Go to <http://www.regulations.gov> and search for the

Docket number USDA–2023–0007. Follow the online instructions for submitting comments.

All comments received will be posted without change and publicly available on www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: Any questions about this notice should be sent to Wes Hanson, Office of Energy and Environmental Policy via email: wes.hanson@usda.gov, or telephone: 202–425–1596.

SUPPLEMENTARY INFORMATION: The Office of Energy and Environmental Policy (OEEP) operates within the Office of the Chief Economist at USDA and functions as the Department-wide focal point on agriculture, rural, and forestry-related climate change activities. OEEP ensures that USDA is a source of objective, analytical assessments of the effects of climate change and proposed response strategies.

The original 2014 report *Quantifying Greenhouse Gas Fluxes in Agriculture and Forestry: Methods for Entity-Scale Inventory* was developed in response to the 2008 Farm Bill, Section 2709, which states that the United States Department of Agriculture (USDA) shall prepare technical guidelines that outline science-based methods to measure the carbon benefits from conservation and land management activities. This report provides scientifically rigorous, Department-wide guidelines for quantifying GHG emissions and carbon sequestration at the farm-, forest-, and entity-scale. The guidelines are intended for use with landowners, nongovernmental organizations, and other groups assessing increases and decreases in GHG emissions and carbon sequestration associated with changes in land management. The report and associated materials, including an erratum published in 2019, are available at: https://www.usda.gov/oce/climate_change/estimation.htm. The report also serves as the foundation for COMET-Farm (<http://cometfarm.nrel.colostate.edu>), a field-scale tool developed by USDA and Colorado State University that provides detailed estimates of the on-farm benefits accrued from the implementation of conservation practices.

Updates to the technical guidelines are primarily focused on adding new quantification methods for management practices that have an adequate body of research to support their GHG benefits, revising the methods where appropriate to reflect the state of the science, improving the accuracy of farm-scale GHG flux estimates, reducing ambiguity in how users select a given method, and improving the usability of the report by

reorganizing the chapters to make the methods easier to access.

USDA currently requests public comment on the following:

1. *Input on the usability, and the level of detail provided for the methods, practices, and technologies for quantifying of GHG emissions and carbon sequestration at the entity-scale.*

1a. Is the overall flow of the report easy to follow and navigate?

1b. Is there an appropriate level of detail included for background information, and for each method?

1c. Are the methods easily followed [consider the format of the report, language or instructions used, background information provided (or not provided), etc.]?

1d. Are the method descriptions adequate for estimation of emissions at the entity scale? If not, list additional details that are needed to implement the approaches.

1e. Are the activity practice data sufficiently described for compiling this information from farm and ranch operations?

1f. Are the graphics provided useful, or are there changes that would increase clarity or accuracy?

1g. Are the data gaps provided complete or are there additional promising research that you recommend be included?

1h. There are some differences in the entity-scale methods compared to methods used in the national inventory (often due to the level of complexity and availability of entity-level data). Do you have any concerns about these differences?

1i. Is the purpose of the report and its update laid out clearly? If not, please provide any suggestions to make this more accessible to all audiences.

1j. Is the definition of an entity clearly defined?

1k. Are the system boundaries appropriate?

2. *Information to improve the accuracy of the guidelines.*

2a. If you are familiar with the methods provided in the original 2014 report, feel free to provide comment on the updated methods and presentation and whether the updates provide benefits.

2b. Where provided, are the methods descriptions for estimating uncertainty adequate? If not, please elaborate on the missing information or need for further details to quantify uncertainty.

3. *Information to improve the usability of the methods.*

3a. Has the reorganization of the report chapters improved the flow of the chapters, and the usability of the technical guidelines?

3b. Are there additional improvements that could be made to improve the usability of the technical guidelines?

3c. What specific changes or improvements could be made to the COMET-Farm online tool to improve the implementation of the USDA technical guidelines?

Please provide information including citations and/or contact details to the address listed above.

Seth Meyer,

Chief Economist.

BILLING CODE 3410–GL–P

DEPARTMENT OF AGRICULTURE

Office of Partnerships and Public Engagement

Advisory Committee on Minority Farmers

AGENCY: Office of Partnerships and Public Engagement (OPPE), USDA.

ACTION: Notice of public hybrid meeting.

SUMMARY: Pursuant to the provisions of the rules and regulations of the United States Department of Agriculture (USDA) and the Federal Advisory Committee Act (FACA), notice is hereby given that a public meeting of the Advisory Committee on Minority Farmers (ACMF) will be convened and accessible in-person and virtually. During this public meeting, the ACMF will consider USDA programs, services, and policies, and how they impact minority farmers. The ACMF seeks to recommend action-oriented strategies that maximize the participation of minority farmers in USDA programs and services.

DATES: The ACMF public meeting is scheduled for June 27–29, 2023, from 9 a.m. to 4 p.m. eastern daylight time (EDT)—each day.

ADDRESSES:

Meeting Pre-Registration: The public is asked to pre-register for the meeting by June 26, 2023, at <https://ems8.intellor.com/?do=register&t=1&p=848053>.

Your pre-registration should include: your name; organization or interest represented; if you plan to give oral comments; and if you require special accommodations. USDA will also accept day-of registrations throughout the meeting. Time will be allotted at the end of each morning and afternoon for comments from those attending in person or virtually. USDA will allow as many individual and organizational comments as time permits.
