**II. Contractor Requirements**

Under contract number No. 68HERD23R0003, the contractor will

perform the following: The contractor will provide support for OPP Docket to support and officially document an agency’s rulemaking or other related activities. Those activities typically follow a three-step sequence in which the government first issues a draft of its proposed action, then receives public feedback on its proposal, and finally publishes a finished product. Dockets contain the **Federal Register** documents, supporting documentation and materials, and public comments associated with each of those steps. Agencies are required to use docket in the development of regulatory actions. Most agencies, including EPA, also use them in other instances where there is a need to officially distribute information and/or solicit public input on their activities. The OPP Docket primary responsibilities are to provide support to rule writers and other docket owners in creating and populating dockets in the Federal Docket Management System (FDMS) and then post them to [Regulations.gov](https://www.regulations.gov) (a cross-government public portal for docketing). Both FDMS and [Regulations.gov](https://www.regulations.gov) are operated by the eRulemaking Program Management Office (PMO) within the General Services Administration (GSA). At different stages in this process, EPA/DC staff engage in activities such as customer service, training, sorting, digitizing, metadata indexing, quality assurance (QA), and records management.

This contract will involve no subcontractors.

OPP has determined that the contracts described in this document involve work that is being conducted in connection with FIFRA, in that pesticide chemicals will be the subject of certain evaluations to be made under

this contract. These evaluations may be used in subsequent regulatory decisions under FIFRA.

Some of this information may be entitled to confidential treatment. The information has been submitted to EPA under FIFRA sections 3, 4, 6, and 7 and under FFDCAs sections 408 and 409.

In accordance with the requirements of 40 CFR 2.307(h)(3), the contracts with Agile Decision Sciences, prohibits use of the information for any purpose not specified in these contracts; prohibits disclosure of the information to a third party without prior written approval from the Agency; and requires that each official and employee of the contractor sign an agreement to protect the information from unauthorized release and to handle it in accordance with the *FIFRA Information Security Manual*. In addition, Agile Decision Sciences is required to submit for EPA approval a security plan under which any CBI will be secured and protected against unauthorized release or compromise. No information will be provided to Agile Decision Sciences until the requirements in this document have been fully satisfied. Records of information provided to Agile Decision Sciences will be maintained by EPA Project Officers for these contracts. All information supplied to Agile Decision Sciences by EPA for use in connection with these contracts will be returned to EPA when Agile Decision Sciences has completed its work.
