SUPPLEMENTARY INFORMATION:

I. Background

Enabled by the 2011 America Invents Act (AIA), the USPTO currently has four regional offices that are located in Detroit, Michigan; San Jose, California (Silicon Valley); Denver, Colorado; and Dallas, Texas. The purposes of the regional offices (ROs), as originally defined in the AIA and amended by the UAIA, are to:

- **RO1:** Better connect patent filers and innovators with the Office, including by increasing outreach activities to individual innovators, small businesses, veterans, low-income populations, students, rural populations, and any geographic group of innovators that the Director may determine to be underrepresented in patent filings;

- **RO2:** Enhance patent examiner and administrative patent judge retention, including patent examiners and administrative patent judges from economically, geographically, and demographically diverse backgrounds;

- **RO3:** Improve recruitment of patent examiners;

- **RO4:** Decrease the number of patent applications waiting for examination; and

- **RO5:** Improve the quality of patent examination.

The USPTO has been focused on outreach and impact, and is working on ways to better support those new to the innovation ecosystem, bringing more people in America into the fold. The USPTO is also studying the role of the regional offices in serving both the public and the needs of our colleagues across the agency.

The UAIA supports the USPTO's expanded outreach efforts by requiring the USPTO to establish, within three years of enactment (*i.e.*, no later than December 29, 2025), a Southeast Regional Office in the geographic region comprised of the states of Virginia, North Carolina, South Carolina, Georgia, Florida, Tennessee, Alabama, Mississippi, Louisiana, and Arkansas. The UAIA requires the Office to consider the following when selecting the site for the SERO:

- **SERO1:** Number of patent-intensive industries that are located near the site;

- **SERO2:** How many research-intensive institutions, including higher education institutions, are located near the site;

- **SERO3:** Governmental and business frameworks, at both the State and local levels, that support intellectual property-intensive industries that are located near the site; and

- **SERO4:** The proximity of the office to anchor institutions (such as hospitals
