

birds, marine mammals, fish, and shoreline and subtidal habitats, as well as effects to human use resulting from impacts on these natural resources. The Trustees then began conducting activities, in cooperation with the RPs, to evaluate injuries and potential injuries within these categories. More information on these resource categories is available in the Administrative Record, including information gathered during the Preassessment.

2. Spill response actions did not address all injuries resulting from the Incident to the extent that restoration would not be necessary. Although response actions were initiated soon after the spill, the nature and location of the discharge prevented recovery of all of the oil and precluded prevention of injuries to some natural resources. In addition, certain response efforts, such as the removal of wrack from beaches and excavation of submerged oil, caused additional injuries to natural resources. It is anticipated that injured natural resources will eventually return to baseline levels (the condition they would have been in had it not been for the Incident), but interim losses have occurred or have likely occurred and will continue until a return to baseline is achieved. In addition, there were lost and diminished human uses of the resources resulting from the impacts to the natural resources and from spill response actions.

3. Feasible primary and compensatory restoration actions exist to address injuries to natural resources and lost human uses resulting from the Incident. The Trustees have compiled a list of restoration projects that could potentially be implemented to compensate for interim losses resulting from the Incident. The Trustees have also sought suggestions from the public on potential restoration projects to compensate for the services and functions provided by natural resources. In addition, assessment procedures such as Habitat Equivalency Analysis and Resource Equivalency Analysis are available to scale the appropriate amount of compensatory restoration required to offset ecological service losses resulting from this Incident. To quantify lost human uses resulting from the Incident, the Trustees, in cooperation with the RP, have collected and compiled data regarding visitor use of impacted sites and associated activities. To value those lost uses, the Trustees are investigating use of a Travel Cost Model and Benefits Transfer Method. To compensate for the lost and diminished human uses arising from the Incident, the Trustees intend to solicit project ideas from local, regional, State,

and Federal managers of parks and other recreational areas, as well as from the general public. The final selection of projects will be informed by project costs, the value of lost use, distribution and character of impacts, and other criteria consistent with state and federal laws and practice.

During restoration planning, the Trustees evaluate potential restoration projects, determine the scale of restoration actions needed to make the environment and the public whole, and release a draft Damage Assessment and Restoration Plan for public review and comment.

Based upon the foregoing determinations and information in the Administrative Record, the Trustees intend to proceed with restoration planning for this Incident.

#### Administrative Record

The Trustees have opened an Administrative Record (Record) in accordance with 15 CFR 990.45. The Record will include documents considered by the Trustees during the preassessment, assessment, and restoration planning phases of the NRDA performed in connection with the Incident. The Record will be augmented with additional information over the course of the NRDA process.

The Administrative Record may be viewed at the following website: <https://www.diver.orr.noaa.gov/web/guest/diver-admin-record/14901>.

#### Opportunity To Comment

Pursuant to 15 CFR 990.14(d), the Trustees seek public involvement in restoration planning for this Incident through public review of, and comment on, documents contained in the Record. The Trustees also intend to seek public comment on a draft Damage Assessment and Restoration Plan when it becomes available.

#### Scott Lundgren,

*Director, Office of Response and Restoration, National Ocean Service, National Oceanic and Atmospheric Administration.*

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

[RTID 0648-XD063]

#### Fisheries of the Gulf of Mexico; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of SEDAR 87 data scoping webinar for Gulf of Mexico white, pink, and brown shrimp.

**SUMMARY:** The SEDAR 87 assessment process of Gulf of Mexico white, pink, and brown shrimp will consist of a Data Workshop, and a series of assessment webinars, and a Review Workshop. See **SUPPLEMENTARY INFORMATION**.

**DATES:** The SEDAR 87 Data scoping webinar will be held July 11, 2023, from 11 a.m. until 1 p.m., Eastern Time.

#### ADDRESSES:

*Meeting address:* The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julie A. Neer at SEDAR (see **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

*SEDAR address:* 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

**FOR FURTHER INFORMATION CONTACT:** Julie A. Neer, SEDAR Coordinator; (843) 571-4366; email: [Julie.neer@safmnc.net](mailto:Julie.neer@safmnc.net).

**SUPPLEMENTARY INFORMATION:** The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data Workshop, (2) a series of assessment webinars, and (3) A Review Workshop. The product of the Data Workshop is a report that compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The assessment webinars produce a report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The product of the Review Workshop is an Assessment Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center.

Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion during the Data scoping webinar are as follows:

Participants will discuss what data may be available for use in the assessment.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

#### Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

**Note:** The times and sequence specified in this agenda are subject to change.

*Authority:* 16 U.S.C. 1801 *et seq.*

Dated: June 12, 2023.

#### Key Israel Marquez,

*Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.*
