

Funding is awarded through the Epidemiology and Laboratory cooperative agreements (ELC), and is intended to provide critical resources to recipients in support of a broad range of healthcare infection prevention and control and epidemiologic surveillance activities to detect, monitor, mitigate, and prevent the spread of HAI/AR in healthcare settings.

HAI/AR programs have experienced an increase in program size and scope

through COVID-19 supplemental funds. To better support the growing programs, CDC has developed high-priority trainings requested by the health department programs with the goal of strengthening public health workforce capacity to prevent and respond to HAI/AR outbreaks in healthcare settings, including preventing the spread of SARS-CoV-2. The proposed training evaluation will be used to assess whether the CDC-developed trainings

are reaching the intended audience and achieving the intended goal of strengthening public health workforce capacity to prevent and respond to HAI/AR outbreaks, including COVID-19, at the individual trainee and program level.

CDC requests OMB approval for an estimated 316 annual burden hours. There is no cost to respondents other than their time to participate.
