

Users to compete,²³ and the Exchange believes that the proposed change would enhance their ability to do so. The proposed change would be responsive to requests from current and potential Users of PCS bundles, who have asked for the bundles to include 40 Gb connections.

The proposed rule change would not impose a burden on competition because it would expand the existing PCS bundles without changing the initial charge or MRC or otherwise adding any fees. As a result of the change a User would receive an enhanced offering, with the option of both 10 Gb and 40 Gb connections, for the same price that the Exchange currently charges for PCS bundles with 10 Gb options only. A User with a PCS bundle would not have to pay a second initial charge to upgrade its PCS bundle from 10 Gb to 40 Gb in whole or, if it opts to retain some 10 Gb connections, in part. As is true now, only Users that purchased a PCS bundle would be charged for it.

All Users would be able to choose what size connections they want, and all Users, whether or not they had a PCS bundle, would be subject to the same requirements for connectivity to the NMS network. Accordingly, the Exchange does not believe that the proposed rule change would place any User at a relative disadvantage compared to other Users.

Finally, the Exchange believes that removing obsolete text from the Fee Schedule would not place any burden on competition that is not necessary or appropriate. Rather, it would benefit competition, as it would enhance the clarity and transparency of the Fee Schedule. It would make the Fee Schedule easier to read and understand, alleviating possible customer confusion.

For these reasons, the Exchange believes that the proposed rule change reflects this competitive environment and does not impose any undue burden on intermarket competition.
