The Black Lung Benefits Act, 30 U.S.C. 901 *et seq.*, provides benefits to coal miners who are totally disabled by black lung disease arising out of coal mine employment, and certain dependents and survivors. When a miner applies for benefits, the Division of Coal Mine Workers' Compensation (DCMWC) is required to give the miner an opportunity to establish his or her eligibility by providing a complete pulmonary evaluation, including a chest radiograph (X-ray), physical examination, pulmonary function test (also known as a ventilatory study), and arterial blood gas study. 30 U.S.C. 923(b); 20 CFR 718.101, 725.406. Forms CM-933, 933b, 988, 988a, 1159, and 2907 are used by physicians to report the results of these diagnostic tests. The information collected on these forms is used to determine whether the miner is totally disabled due to black lung disease caused by coal mine employment. The Black Lung Benefits Act, 30 U.S.C. 901 *et seq.*, and implementing regulation, 20 CFR 725.406, authorize this information collection.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB under the PRA approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the **ADDRESSES** section. Written comments will receive consideration, and summarized and included in the request for OMB approval of the final ICR. Submitted comments will also be a matter of public record for this ICR and posted on the internet, without redaction. The DOL encourages commenters not to include personally identifiable information, confidential business data, or other sensitive
