

activities; determinations regarding whether a product must be regulated under FIFRA; and pesticide tolerances under the FFDCA.

*Form numbers:* 8570–1, 8570–4, 8570–5, 8570–17, 8570–25, 8570–27, 8570–34, 8570–35, 8570–36 and 8570–37.

*Respondents/affected entities:* Pesticide and other agricultural chemical manufacturing, research, and development in the physical, engineering, and life sciences, biological products (except diagnostic) manufacturing, colleges, universities, and professional schools, farm supplies wholesalers, flower, nursery stock, and florist's supplies wholesalers, state government, other chemical and allied product merchant wholesalers, exterminating and pest control service, management, scientific, and technical consulting services.

*Respondent's obligation to respond:* Mandatory under FIFRA and FFDCA.

*Estimated number of respondents:* 5,435 (total).

*Frequency of response:* On occasion.

*Total estimated burden:* 2,175,048 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$183,517,210 (per year), which includes \$0 annualized capital or operation & maintenance costs.

*Changes in the estimates:* This information collection combines the burdens from eight previously approved ICRs. The total combined respondent burden hours from those previously approved ICRs by OMB were estimated at 2,175,048 hours, the same amount requested for this ICR.

The total combined cost burden from these eight previously approved ICRs was \$170,250,338. The total cost burden requested for this ICR is \$183,157,210—a increase of \$12,906,872. The difference between the current cost burden request and the previously approved requests is due only to adjustments in EPA's estimates of the wage rates and material costs that were revised to reflect 2022 dollars for this ICR.

**SUPPLEMENTARY INFORMATION:** This is a proposed extension of the ICR, which is currently approved through August 31, 2023. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Public comments were previously requested via the **Federal Register** on January 24, 2023 during a 60-day comment period (88 FR 4177). This notice allows for an additional 30 days for public comments. Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at [www.regulations.gov](http://www.regulations.gov) or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

**Abstract:** This information collection is necessary to implement the requirements of the Significant New Alternatives Policy (SNAP) program for evaluating and regulating substitutes for ozone-depleting substances (ODS) being phased out under the stratospheric ozone protection provisions of the Clean Air Act (CAA) and globally under the *Montreal Protocol on Substances that Deplete the Ozone Layer*. Under CAA section 612, EPA is authorized to identify and restrict the use of substitutes for class I and class II ODS (listed in 40 CFR part 82, subpart A, appendices A and B) where EPA determines other alternatives are available or potentially available that reduce overall risk to human health and the environment. Any producer of a new substitute must submit a notice of intent to introduce a substitute into interstate commerce 90 days prior to such introduction. The producer must also provide EPA with information covering a wide range of health and environmental factors. The EPA SNAP program then reviews proposed substitutes based on established risk-assessment criteria and procedures set forth in associated regulations. Results are published in updated lists of acceptable and unacceptable substitutes sorted by end-use categories.

Responses to the collection of information are mandatory under section 612 for anyone who sells or, in certain cases, uses substitutes for an

ODS after April 18, 1994. Measures to protect confidentiality of information collected under the SNAP program are based on EPA's confidentiality regulations (40 CFR 2.201 *et seq.*, or subpart B). Submitters may designate all or portions of their forms or petitions as confidential. EPA requires the submitters to substantiate their claim of confidentiality. Under CAA section 114(c), emissions information may not be claimed as confidential.

Any substitute which is a new chemical must also be submitted to the Agency under the New Chemicals (Premanufacture Notice) program under the Toxic Substances Control Act (TSCA). Furthermore, alternatives that will be used as sterilants must be filed jointly with EPA's Office of Pesticide Programs and with SNAP.

*Form Numbers:* 1264–14; 1265–14.

*Respondents/affected entities:*

Manufacturers, importers, formulators, and processors of substitutes for ODS.

*Respondent's obligation to respond:* Mandatory (40 CFR 82.176).

*Estimated number of respondents:* 154 (per year).

*Frequency of response:* Annual.

*Total estimated burden:* 4,855 hours (per year). Burden is defined at 5 CFR 1320.03(b).

*Total estimated cost:* \$444,249, which includes \$22,912 annualized capital or operation & maintenance costs.

*Changes in the Estimates:* The number of SNAP submissions each year is expected to remain the same from the previous ICR, at an average of 15 per year during the next 3 years. In 2020 the Agency received 20 new SNAP submissions, and in 2021 the Agency received 13 submissions. In the first 10 months of 2022, the Agency received 6 submissions, although multiple submissions applied for more than 5 end-uses. Many of the recent SNAP submissions, and those anticipated over the next three years, are for chemicals previously found acceptable for other SNAP applications or for blends of alternatives already found acceptable. The burden of developing supporting information for the majority of these submissions is expected to decrease because it is easier to find and review information for substitutes that have been reviewed previously.

There is an estimated 20% reduction in the number of respondents responsible for recordkeeping for substitutes acceptable subject to use conditions and narrowed use limits. This reduction is expected because the increased availability of alternatives decreases the need for industry to use alternatives previously listed as

acceptable subject to narrowed use limits.
