SUPPLEMENTARY INFORMATION: The Energy Independence and Security Act of 2007 (EISA) (Pub. L. 110-140) establishes procedures for the U.S. Department of Housing and Urban Development (HUD) and the U.S. Department of Agriculture (USDA) to adopt periodic revisions to the International Energy Conservation Code (IECC) and to ANSI/ASHRAE/IES Standard 90.1: Energy Standard for Buildings, Except Low-Rise Residential Buildings (ASHRAE 90.1), subject to a determination by HUD and USDA that the revised codes do not negatively affect the availability or affordability of new construction of single and multifamily housing covered by EISA. On May 18, 2023, at 88 FR 31773, HUD

and USDA published a notice of preliminary determination entitled "Adoption of Energy Efficiency Standards for New Construction of HUD- and USDA-Financed Housing: Preliminary Determination and Solicitation of Comment," announcing the two agencies' joint preliminary determination that adoption of the 2021 IECC and ASHRAE 90.1-2019 code standards will not negatively affect the affordability and availability of housing for new construction of HUD and USDA housing covered by EISA and seeking public comment on the preliminary determination. In making the preliminary determination, the first step to ultimately requiring compliance with these standards in HUD and USDA housing covered by EISA, the notice relies on several studies that show that these codes are cost effective in that the incremental cost of the additional efficiency measures pays for themselves with energy cost savings on a life-cycle basis.

While the preliminary determination provided a 60-day comment period, HUD has received feedback from several commenters requesting additional time to review and provide comments on this rule. Therefore, HUD is extending the deadline for comments for an additional 21 days to August 7, 2023.
