

[https://www.musictherapy.org/about/scope\\_of\\_music\\_therapy\\_practice/](https://www.musictherapy.org/about/scope_of_music_therapy_practice/).

Because the practice of Music Therapists is not changing, there will be no impact on the practice of this occupation when this national standard of practice is implemented.

### Proposed National Standard of Practice for Music Therapists

1. Music Therapists use an evidence-based clinical practice that uses music and music techniques to target group and individualized goals across the clinical domains. Music interventions can target many goals including enhancement of cognitive processing (e.g., neuroconnectivity, memory, retention), sensory integration, fine and gross motor movement (e.g., initiation, sustaining, inhibiting), communication and support for mental and emotional well-being and recovery.

2. VA Music Therapists possess the education and certification required by VA qualification standards. See VA Handbook 5005, Staffing, Part II, Appendix G60, dated June 7, 2019.

3. VA Music Therapists practice in accordance with the Standards of Clinical Practice from AMTA and the Scope of Music Therapy Practice jointly developed by CBMT and AMTA, available at: <https://www.musictherapy.org/about/standards/>. VA reviewed license and certification requirements for this occupation in June 2023 and confirmed that all VA Music Therapists follow AMTA and CBMT standards.

4. Although VA only requires a certification, 11 states require a state license in order to practice as a Music Therapist in that state: Georgia, Maryland, Nevada, New Jersey, New York, North Dakota, Oklahoma, Oregon, Rhode Island, Utah and Virginia. Of those, the following states exempt Federal employees from its state license requirements: Maryland, Nevada and Oklahoma. VA reviewed license and certification requirements for this occupation in June 2023 and confirmed that there is no variance in how VA Music Therapists practice in any state.

### Request for Information

1. Are there any required trainings for the aforementioned practices that we should consider?

2. Are there any factors that would inhibit or delay the implementation of the aforementioned practices for VA health care professionals in any states?

3. Is there any variance in practice that we have not listed?

4. What should we consider when preempting conflicting state laws, regulations, or requirements regarding supervision of individuals working

toward obtaining their license or unlicensed personnel?

5. Is there anything else you would like to share with us about this national standard of practice?

### Signing Authority

Denis McDonough, Secretary of Veterans Affairs, approved and signed this document on July 10, 2023, and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs.

**Jeffrey M. Martin,**

*Assistant Director, Office of Regulation Policy & Management, Office of General Counsel, Department of Veterans Affairs.*

## DEPARTMENT OF VETERANS AFFAIRS

### Notice of Request for Information on the Department of Veterans Affairs Recreation Therapists Standard of Practice

**AGENCY:** Department of Veterans Affairs.  
**ACTION:** Request for information.

**SUMMARY:** The Department of Veterans Affairs (VA) is requesting information to assist in developing a national standard of practice for VA Recreation Therapists. VA seeks comments on various topics to help inform VA's development of this national standard of practice.

**DATES:** Comments must be received on or before September 26, 2023.

**ADDRESSES:** Comments must be submitted through [www.regulations.gov](http://www.regulations.gov). Except as provided below, comments received before the close of the comment period will be available at [www.regulations.gov](http://www.regulations.gov) for public viewing, inspection, or copying, including any personally identifiable or confidential business information that is included in a comment. We post the comments received before the close of the comment period on the following website as soon as possible after they have been received: <http://www.regulations.gov>. VA will not post on [Regulations.gov](http://www.regulations.gov) public comments that make threats to individuals or institutions or suggest that the commenter will take actions to harm the individual. VA encourages individuals not to submit duplicative comments. We will post acceptable comments from multiple unique commenters even if the content is identical or nearly identical to other comments. Any public

comment received after the comment period's closing date is considered late and will not be considered in any potential future rulemaking.

### FOR FURTHER INFORMATION CONTACT:

Ethan Kalett, Office of Regulations, Appeals and Policy (10BRAP), Veterans Health Administration, Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420, 202-461-0500. This is not a toll-free number.

### SUPPLEMENTARY INFORMATION:

#### Authority

Chapters 73 and 74 of 38 U.S.C. and 38 U.S.C. 303 authorize the Secretary to regulate the professional activities of VA health care professions to make certain that VA's health care system provides safe and effective health care by qualified health care professionals to ensure the well-being of those Veterans who have borne the battle.

On November 12, 2020, VA published an interim final rule confirming that VA health care professionals may practice their health care profession consistent with the scope and requirements of their VA employment, notwithstanding any State license, registration, certification or other requirements that unduly interfere with their practice (38 CFR 17.419; 85 FR 71838). Specifically, this rulemaking confirmed VA's current practice of allowing VA health care professionals to deliver health care services in a State other than the health care professional's State of licensure, registration, certification or other State requirement, thereby enhancing beneficiaries' access to critical VA health care services. The rulemaking also confirmed VA's authority to establish national standards of practice for its health care professionals which would standardize a health care professional's practice in all VA medical facilities.

The rulemaking explained that a national standard of practice describes the tasks and duties that a VA health care professional practicing in the health care profession may perform and may be permitted to undertake. Having a national standard of practice means that individuals from the same VA health care profession may provide the same type of tasks and duties regardless of the VA medical facility where they are located or the State license, registration, certification or other State requirement they hold. We emphasized in the rulemaking and reiterate here that VA will determine, on an individual basis, that a health care professional has the necessary education, training and skills to perform the tasks and duties detailed in the national standard of

practice and will only be able to perform such tasks and duties after they have been incorporated into the individual's privileges, scope of practice or functional statement. The rulemaking explicitly did not create any such national standards and directed that all national standards of practice would be subsequently created via policy.

#### Need for National Standards of Practice

As the Nation's largest integrated health care system, it is critical that VA develops national standards of practice to ensure beneficiaries receive the same high-quality care regardless of where they enter the system and to ensure that VA health care professionals can efficiently meet the needs of beneficiaries when practicing within the scope of their VA employment. National standards are designed to increase beneficiaries' access to safe and effective health care, thereby improving health outcomes. The importance of this initiative has been underscored by the COVID-19 pandemic. With an increased need for mobility in our workforce, including through VA's Disaster Emergency Medical Personnel System, creating a uniform standard of practice better supports VA health care professionals who already frequently practice across State lines. In addition, the development of national standards of practice aligns with VA's long-term deployment of a new electronic health record (EHR). National standards of practice are critical for optimal EHR implementation to enable the specific roles for each health care profession in EHR to be consistent across the Veterans Health Administration (VHA) and to support increased interoperability between VA and the Department of Defense (DoD). DoD has historically standardized practice for certain health care professionals, and VHA closely partnered with DoD to learn from their experience.

#### Process To Develop National Standards of Practice

Consistent with 38 CFR 17.419, VA is developing national standards of practice via policy. There will be one overarching national standard of practice directive that will generally describe VHA's policy and have each individual national standard of practice as an appendix to the directive. The directive and all appendices will be accessible on the VHA Publications website at: <https://vaww.va.gov/vhapublications/> (internal) and <https://www.va.gov/vhapublications/> (external) once published.

To develop these national standards, VA is using a robust, interactive process

that is consistent with the guidance outlined in Executive Order (E.O.) 13132 to preempt State law. The process includes consultation with internal and external stakeholders, including State licensing boards, VA employees, professional associations, Veterans Service Organizations, labor partners and others. For each identified VA occupation, a workgroup comprised of health care professionals conducts State variance research to identify internal best practices that may not be authorized under every State license, certification or registration, but would enhance the practice and efficiency of the profession throughout the agency. The workgroup is comprised of VA employees who are health care professionals in the identified occupation; they may consult with internal stakeholders at any point throughout the process. If a best practice is identified that is not currently authorized by every State, the workgroup determines what education, training and skills are required to perform such task or duty. The workgroup then drafts a proposed VA national standard of practice using the data gathered during the State variance research and incorporates internal stakeholder feedback to date.

The proposed national standard of practice is internally reviewed, to include by an interdisciplinary workgroup consisting of representatives from Quality Management; Field Chief of Staff; Academic Affiliates; Field Chief Nursing Officer; Ethics; Workforce Management and Consulting; Surgery; Credentialing and Privileging; Field Chief Medical Officer; and EHR Modernization.

Externally, the proposed national standard of practice is provided to our partners in DoD. In addition, VA labor partners are engaged informally as part of a pre-decisional collaboration. Consistent with E.O. 13132, a letter is sent to each State board and certifying organization that includes the proposed national standard and an opportunity to further discuss the national standard with VA. After the States and certifying organization have received notification, the proposed national standard of practice is published to the **Federal Register** for 60 days to obtain feedback from the public, including professional associations and unions. At the same time, the proposed national standard is published on an internal VA site to obtain feedback from VA employees. Feedback from State boards, professional associations, unions, VA employees and any other person or organization who informally provides comments via the **Federal Register** will

be reviewed. VA will make appropriate revisions in light of the comments, including those that present evidence-based practice and alternatives that help VA meet our mission and goals and that are better for Veterans or VA health care professionals. We will publish a collective response to all comments at <https://www.va.gov/standardsofpractice>.

After the national standard of practice is finalized, approved and published in VHA policy, VA will implement the tasks and duties authorized by that national standard of practice. Any tasks or duties included in the national standard will be incorporated into an individual health care professional's privileges, scope of practice or functional statement following any training and education necessary for the health care professional to perform those functions. Implementation of the national standard of practice may be phased in across all medical facilities, with limited exemptions for health care professionals as needed.

#### National Standard for Recreation Therapists

The proposed format for national standards of practice when there is a national certification, and some States require a license is as follows. The first paragraph provides general information about the profession and what the health care professionals can do. The second paragraph references the education and certification needed to practice this profession at VA. The third paragraph confirms that this profession follows the standard set by the national certifying body. A final statement explains that while VA only requires a national certification, some States also require licensure for this profession. The standard includes information on which States offer an exemption for Federal employees and where VA will preempt State laws, if applicable.

We note that the proposed standards of practice do not contain an exhaustive list of every task and duty that each VA health care professional can perform. Rather, it is designed to highlight whether there are any areas of variance in how this profession can practice across States and how this profession will be able to practice within VA notwithstanding their State license, certification, registration and other requirements.

Recreation Therapists systematically use recreation and activity-based interventions for the specific purpose of improving the physical, social, emotional, cognitive and spiritual functioning of individuals; enhancing well-being; and enabling greater quality

of life through recreation participation for individuals with injury, illness or disability. VA qualification standards require Recreation Therapists to have an active, current, full and unrestricted certification as a Certified Therapeutic Recreation Specialist from the National Council for Therapeutic Recreation Certification (NCTRC). Although NCTRC is the certification body for Recreation Therapists, the American Therapeutic Recreation Association (ATRA) has developed the Standards for the Practice of Recreational Therapy, which is followed by all VA Recreation Therapists.

VA reviewed whether there are any alternative registrations, certifications or State requirements that could be required for a Recreation Therapist and found that five States require a license to practice as a Recreation Therapist in that State. Of those, one State exempts Federal employees from its State license requirements. The standards set forth in the licensure requirements for all five States are consistent with what is permitted under the Standards of Practice for Recreational Therapy from the ATRA. Therefore, there is no variance in how any Recreation Therapists practice in any State.

VA proposes to adopt a standard of practice consistent with the ATRA standards. Therefore, VA Recreation Therapists will continue to follow the same standard as set by their national certification. The ATRA standards can be found here: <https://www.atra-online.com/general/custom.asp?page=SOP>.

Because the practice of Recreation Therapists is not changing, there will be no impact on the practice of this occupation when this national standard of practice is implemented.

### Proposed National Standard of Practice for Recreation Therapists

1. Recreation Therapists systematically use recreation and activity-based interventions for the specific purpose of improving the physical, social, emotional, cognitive and spiritual functioning of individuals; enhancing wellbeing; and enabling greater quality of life through recreation participation for individuals with injury, illness or disability. Recreation Therapists utilize treatment interventions, leisure education and recreation experiences to improve functional abilities, foster recovery, enhance health and wellness, promote the development and maintenance of a healthy leisure lifestyle and increase independent participation in activities of choice through activity modification, adaptation and facilitation.

2. Recreation Therapists in VA possess the education and certification required by VA qualification standards. See VA Handbook 5005, Staffing, Part II, Appendix G60, dated June 7, 2019.

3. VA Recreation Therapists practice in accordance with the Standards for the Practice of Recreational Therapy from ATRA available at: <https://www.atra-online.com/>. VA reviewed license and certification requirements for this occupation in June 2023 and confirmed that all Recreation Therapists in VA follow the ATRA standards.

4. Although VA only requires a certification, five States require a State license in order to practice as a Recreation Therapist in that State: New Hampshire, New Jersey, North Carolina, Oklahoma and Utah. Of those, the following State exempts Federal employees from its State license requirements: Oklahoma.

*VA reviewed license and certification requirements for this occupation in June 2023 and confirmed that there is no variance in how VA Recreation Therapists practice in any State.*

### Request for Information

1. Are there any required trainings for the aforementioned practices that we should consider?

2. Are there any factors that would inhibit or delay the implementation of the aforementioned practices for VA health care professionals in any States?

3. Is there any variance in practice that we have not listed?

4. What should we consider when preempting conflicting State laws, regulations or requirements regarding supervision of individuals working toward obtaining their license or unlicensed personnel?

5. Is there anything else you would like to share with us about this national standard of practice?

### Signing Authority

Denis McDonough, Secretary of Veterans Affairs, approved and signed this document on July 12, 2023, and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs.

## DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900-0059]

### Agency Information Collection Activity: Statement of Person Claiming To Have Stood in Relation of Parent

**AGENCY:** Veterans Benefits Administration, Department of Veterans Affairs.

**ACTION:** Notice.

**SUMMARY:** Veteran's Benefits Administration (VBA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of a currently approved collection, and allow 60 days for public comment in response to the notice.

**DATES:** Written comments and recommendations on the proposed collection of information should be received on or before September 26, 2023.

**ADDRESSES:** Submit written comments on the collection of information through Federal Docket Management System (FDMS) at [www.Regulations.gov](http://www.Regulations.gov) or to Nancy Kessinger, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to [nancy.kessinger@va.gov](mailto:nancy.kessinger@va.gov). Please refer to "OMB Control No. 2900-0059" in any correspondence. During the comment period, comments may be viewed online through FDMS.

**FOR FURTHER INFORMATION CONTACT:** Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20420, (202) 266-4688 or email [maribel.aponte@va.gov](mailto:maribel.aponte@va.gov). Please refer to "OMB Control No. 2900-0059" in any correspondence.

**SUPPLEMENTARY INFORMATION:** Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility;
