

monitoring network documentation are also maintained by each state and local agency, in AQS electronic format where possible.

Although the state and local air pollution control agencies and tribal entities are responsible for the operation of the air monitoring networks, the EPA funds a portion of the total costs through federal grants. The costs shown in this renewal are the total costs incurred for the monitoring program regardless of the source of the funding. This practice of using the total cost is consistent with prior ICR submittals and renewals.

Form numbers: None.

Respondents/affected entities: State, Local, and Tribal Air Pollution Control Agencies.

Respondent's obligation to respond: Mandatory (40 CFR part 58).

Estimated number of respondents: 168 (total).

Frequency of response: Quarterly.

Total estimated burden: 1,449,968 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: \$181,278,444 (per year), includes \$70,147,486 annualized capital or operation & maintenance costs.

Changes in the estimates: This is a decrease of 321,694 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease is due to the consolidation of monitors into fewer sites, consolidation of PAMS network burden estimates to avoid double counting, termination of unnecessary monitors, and more efficient automated procedures (e.g., moving from manual samplers to automated continuous samplers) for measuring and reporting data. The decrease is offset somewhat by the additional burden and cost estimates included for asset management and sensors.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through July 31, 2023. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on November 4, 2022 during a 60-day comment period (87 FR 66695). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: The authority for EPA's oil pollution prevention requirements is derived from section 311(j)(1)(C) of the Clean Water Act, as amended by the Oil Pollution Act of 1990. EPA's regulation is codified at 40 CFR part 112. Although the owner or operator is the primary data user, EPA may also require the owner or operator to submit data to the Agency in certain situations to ensure facilities comply with the SPCC regulation and to help allocate response resources. State and local governments may use the data, which are not

generally available elsewhere and can assist local emergency preparedness planning efforts.

Form numbers: None.

Respondents/affected entities:

Owners or operators of facilities required to have Spill Prevention, Control, and Countermeasure (SPCC) plans under the Oil Pollution Prevention regulation (40 CFR part 112) and which, because of their location, could reasonably be expected to cause substantial harm to the environment.

Respondent's obligation to respond: Mandatory, pursuant to 40 CFR 112.3(e).

Estimated number of respondents: 549,362 (total).

Frequency of response: Facilities must prepare and implement an SPCC Plan before beginning operations and review, evaluate, and update the SPCC Plan every five years. In the event of certain discharges of oil into navigable waters, a facility owner or operator must submit certain information to the Regional Administrator within 60 days.

Total estimated burden: 6,625,194 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$893,604,697 (per year), which includes \$208,724,033 annualized capital or operation & maintenance (O&M) costs.

Changes in the estimates: There is an increase of 315,671 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to changes in the universe of regulated facilities after accounting for changes in the numbers and types of existing and newly regulated facilities in the new ICR period, as well as small adjustments in unit burden estimates for activities associated with SPCC Plan amendments. While the universe of regulated facilities decreases by less than one percent during the new ICR period; (549,362 vs. 549,785 respondents), a slightly higher proportion of this universe consists of regulated facilities with a relatively greater unit burden.

Courtney Kerwin,

Director, Regulatory Support Division.
