BILLING CODE P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Stipulated Order Under the Clean Water Act

On July 26, 2023, the Department of Justice lodged a proposed Stipulated Order on Sewer System with the United States District Court for the Southern District of Mississippi in the lawsuit entitled *United States and State of Mississippi v. City of Jackson, Mississippi*, Civil Action No. 3:12-cv-790-HTW-LGI (S.D. Miss.) [Docket No. 36].

The proposed Stipulated Order places the operation of the sewer system of the City of Jackson, Mississippi ("City") under the control of an Interim Third-Party Manager. The proposed Stipulated Order requires the Interim Third-Party Manager to perform substantial work to address problems plaguing the City's sewer system. The work required includes addressing more than 200 emergency sewer failure locations (many resulting in sanitary sewer overflows), addressing prohibited bypasses of treatment prior to discharging wastewater into the Pearl River, and implementing Management, Operations, and Maintenance Programs. The proposed Stipulated Order does not resolve any claims against the City or any non-compliance with the 2013 consent decree in this case.

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), Public Law 95-164 as amended, 30 U.S.C. 813(h), authorizes Mine Safety and Health Administration (MSHA) to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811,

authorizes the Secretary of Labor (Secretary) to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines.

MSHA's mandatory standards for hoists and appurtenances, including wire rope, used for hoisting persons for both surface and underground metal and nonmetal mines are referenced in 30 CFR 56 and 30 CFR 57, for underground coal mines in 30 CFR 75, and for surface coal mines and surface work areas of underground coal mines in 30 CFR 77.

Initial Wire Rope Diameter Measurement

30 CFR 56.19022, 30 CFR 57.19022, 30 CFR 75.1432 and 30 CFR 77.1432 require the diameter of newly installed wire rope to be measured at least once in every third interval of the rope's active length to establish a baseline for subsequent semiannual measurements. A record of the measurements is required to be made and retained until the rope is retired from service.

Biweekly and Daily Visual Examinations of Wire Ropes and Hoists

30 CFR 56.19023(a), 57.19023(a), 75.1433(a), and 77.1433(a) require the wire rope to be examined visually at least every fourteen days for visible structural damage, corrosion, and improper lubrication or dressing. If the examination reveals weakening portions of the rope, the weakened portions must be monitored daily for further deterioration until retirement criteria require that the rope be removed from service. 30 CFR 56.19023(d), 57.19023(d), 75.1433(d), and 77.1433(d) require that the person conducting the examination must certify that the examination was made and the condition of weakening portions. The records must be retained for one year.
