SUPPLEMENTARY INFORMATION:

I. Background

Sensor Concepts & Applications, Inc. (SCA) is a privately held company in Glen Arm, Maryland. SCA possesses and uses SNM in greater than critical mass quantities for research and development of radiation detection instrumentation at its location in Glen Arm, Maryland as well as other locations selected by the U.S. Department of Defense (DOD). The quantity of SNM possessed and used by SCA requires an NRC-issued SNM license pursuant to part 70 of title 10 of the *Code of Federal Regulations* (10 CFR), “Domestic licensing of special nuclear material.”

II. Discussion

Pursuant to 10 CFR 2.106, the NRC is providing notice of the issuance of renewal of a 10 CFR part 70 license, SNM-2017, to SCA. The license authorizes SCA to possess and use SNM in support of the DOD, Defense Threat Reduction Agency, and the United States Army. The supporting activities include concept demonstrations, test and evaluation, characterization evaluations, and operator training activities to use technology to demonstrate techniques to detect special nuclear materials and clear alarms that represent a non-threat.

SCA’s original license renewal application for a 10-year license was made by letter dated November 24, 2021. On February 1, 2022, the NRC sent SCA an acceptance letter, noting that the license renewal application contained sufficient information for a detailed technical review. SCA was also notified that, since it filed its license renewal application at least 30 days before the license’s expiration date, pursuant to the timely renewal provisions in 10 CFR 70.38(a), SCA was permitted to continue using its SNM in accordance with the existing SNM-2017 license, pending a final decision by the Commission on the license renewal application.

On March 7, 2022, a notice of receipt of SCA’s license renewal application with an opportunity for the public to request a hearing and petition for leave to intervene was published in the **Federal Register** (87 FR 12740). The NRC did not receive a request for a

hearing or for a petition for leave to intervene.

The license renewal application was subsequently supplemented by letters dated May 26, 2022, September 22, 2022, October 4, 2022, and November 17, 2022.

The NRC staff determined that SCA’s proposed licensed activities meet the categorical exclusion in 10 CFR 51.22(c)(14)(v) for the use of radioactive materials for research and development and for educational purposes. Therefore, an environmental assessment and an environmental impact statement are not required for the renewal of the SNM-2017 license.

The NRC finds that the renewed license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended, and the NRC’s rules and regulations as set forth in 10 CFR chapter 1. Accordingly, the renewed license issued on July 27, 2023, is effective immediately. The NRC prepared a safety evaluation report for the renewal of License SNM-2017 and concluded that the licensee can continue to use and possess SNM in accordance with its license without endangering the health and safety of the public, and that this action will not significantly affect the quality of the human environment for the duration of the license.
