

paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might “further reduce the information collection burden for small business concerns with fewer than 25 employees.”

Needs and Uses: *Deployment of Text-to-911.* In a Second Report and Order released on August 13, 2014, FCC 14–118, published at 79 FR 55367, September 16, 2014, the Commission adopted final rules—containing

information collection requirements—to enable the Commission to implement text-to-911 service. The text-to-911 rules provide enhanced access to emergency services for people with disabilities and fulfilling a crucial role as an alternative means of emergency communication for the general public in situations where sending a text message to 911 as opposed to placing a voice call could be vital to the caller's safety. The Second Report and Order adopted rules to commence the implementation of text-to-911 service with an initial deadline of December 31, 2014 for all covered text providers to be capable of supporting text-to-911 service. The Second Report and Order also provided that covered text providers would then have a six-month implementation period. They must begin routing all 911 text messages to a Public Safety Answering Point (PSAP) by June 30, 2015 or within six months of a valid PSAP request for text-to-911 service, whichever is later. To implement these requirements, the Commission seeks to collect information primarily for a database in which PSAPs voluntarily register that they are technically ready to receive text messages to 911. As PSAPs become text-ready, they may either register in the PSAP database (or submit a notification to PS Docket Nos. 10–255 and 11–153), or provide other written notification reasonably acceptable to a covered text messaging provider. Either measure taken by the PSAP constitutes sufficient notification pursuant to the rules in the Second Report and Order. PSAPs and covered text providers may also agree to an alternative implementation timeframe (other than six months).

Covered text providers must notify the FCC of the dates and terms of any such alternate timeframe within 30 days of the parties' agreement. Additionally, the rules adopted by the Second Report and Order include other information collections for third party notifications necessary for the implementation of text-to-911, including notifications to consumers, covered text providers, and the Commission. These notifications are essential to ensure that all affected parties are aware of the limitations, capabilities, and status of text-to-911 services. These information collections enable the Commission to meet the objectives for implementation of text-to-911 service and for compliance by covered text providers with the six-month implementation period in furtherance of the Commission's core mission to ensure the public's safety. These rules are codified at 47 CFR 9.10(q).

Real Time Text. In a Report and Order and Further Notice of Proposed Rulemaking, released on December 16, 2016, in CG Docket No. 16–145 and GN Docket No. 15–178, the Commission amended its rules to facilitate a transition from text telephone (TTY) technology to RTT as a reliable and interoperable universal text solution over wireless internet protocol (IP) enabled networks for people who are deaf, hard of hearing, deaf-blind, or have a speech disability. Section 9.10(c) of the rules requires Commercial Mobile Radio Service (CMRS) providers to be “capable of transmitting 911 calls from individuals with speech or hearing disabilities through means other than mobile radio handsets, e.g., through the use of [TTY devices].” Additionally, “CMRS providers that provide voice communications over IP facilities are not required to support 911 access via TTYs if they provide 911 access via [RTT] communications, in accordance with 47 CFR part 67, except that RTT support is not required to the extent that it is not achievable for a particular manufacturer to support RTT on the provider's network.” See 47 CFR 9.10(c). The Commission's Report and Order provides that once a PSAP is so capable, the requested service provider must begin delivering RTT communications in an RTT format within six months after a valid request is made—to the extent the provider has selected RTT as its accessible text communication method.
