NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number, and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Title of Collection: Request for Comment regarding Common Disclosure Forms for the Biographical Sketch and Current and Pending (Other) Support.

OMB Approval Number: 3145-NEW.

Type of Request: Intent to seek approval to establish an information collection for common disclosure forms for the Biographical Sketch and Current and Pending (Other) Support for three years.

I. Background

Section 4(b) of NSPM-33 directs that "research funding agencies shall require the disclosure of information related to potential conflicts of interest and commitment from participants in the federally funded R&D enterprise The appropriate disclosure requirement varies depending on the individual's role in the United States R&D enterprise." Section 4(b)(vi) directs that "agencies should standardize forms for initial disclosures as well as annual updates, . . . and should provide clear instructions to accompany these forms and to minimize any associated administrative burden."

The NSTC Research Security Subcommittee has worked to develop consistent disclosure requirements from senior personnel, as well as to develop proposed common disclosure forms for the Biographical Sketch and Current and Pending (Other) Support sections of an application for Federal research and development (R&D) grants or cooperative agreements. The purpose of the Biographical Sketch is to assess how well qualified the individual, team, or organization is to conduct the proposed activities. The purpose of Current and Pending (Other) Support is to assess the capacity of the individual to carry out

the research as proposed and to help identify any potential scientific and budgetary overlap/duplication, as well as overcommitment with the project being proposed.

These common forms are intended to clarify what is expected of senior personnel applying for R&D funding from Federal research funding agencies. Variations among research agencies will be limited to cases: (a) where required by statute or regulation; (b) where more stringent protections are necessary for protection of R&D that is classified, export-controlled, or otherwise legally protected; or (c) for other compelling reasons consistent with individual agency authorities and as coordinated through the NSTC.

As stated in the NSPM–33 Implementation Guidance, “the goal of these common forms and accompanying instructions is to ensure that applying for awards from any Federal research

funding agency will require disclosing the same information in the same manner, to increase clarity and reduce administrative burden on the research community. In some cases, Federal research funding agencies may adapt the forms and instructions, where required by their legal authorities. Such common disclosure forms also will allow the research community to identify and point out where greater clarity may be needed.”

Agencies may develop agency- or program-specific data elements and instructions, if necessary, to meet programmatic requirements, although agencies will be instructed to minimize the degree to which they supplement the common forms. Modification, supplementation, or deviation from these common disclosure forms will require clearance by OMB/OIRA under the PRA process.

These common disclosure forms are intended to replace existing forms/formats currently used by agencies for these sections of applications, thereby increasing the consistency of disclosure forms and reducing administrative burden.

II. Invitation to Comment

The following documents are available for review and comment on the NSF website (see https://www.nsf.gov/bfa/dias/policy/nstc_disclosure.jsp):

- a. A common Biographical Sketch form comprised of data elements and associated instructions; and
 - b. A common Current and Pending (Other) Support form comprised of data elements and associated instructions.
- Input is welcome on any fatal flaws associated with the proposed common disclosure forms, including the accompanying instructions.
