

location. For non-fixed devices, when dispatchable location is not technically feasible, internet-based TRS providers may fall back to Registered Location or provide alternative location information. As a last resort, internet-based providers may route calls to Emergency Relay Calling Centers after making a good faith effort to obtain location data from all available alternative location sources.

Dispatchable location means a location delivered to the PSAP with a 911 call that consists of the validated street address of the calling party, plus additional information such as suite, apartment or similar information necessary to adequately identify the location of the calling party. Automated dispatchable location means automatic generation of dispatchable location. Alternative location information is location information (which may be coordinate-based) sufficient to identify the caller's civic address and approximate in-building location, including floor level, in large buildings.

On January 31, 2020, the Commission released *Structure and Practices of the Video Relay Service Program; Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities*, FCC 20–7, 85 FR 27309, May 8, 2020 (*VRS At-Home Call Handling Order*). The Commission amended its rules to convert the VRS at-home call handling pilot program into a permanent one, thereby allowing CAs to work from home. To ensure user privacy and call confidentiality and to help prevent waste, fraud, and abuse, the modified information collections include requirements for VRS providers to apply for certification to allow their communications assistants to handle calls while working at home; monitoring and oversight requirements; and reporting requirements.

On June 30, 2022, the Commission released *Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities; Structure and Practices of the Video Relay Service Program; Misuse of internet Protocol Captioned Telephone Service*, FCC 22–51, published at 87 FR 57645, September 21, 2022 (*Registration Grace Period Order*). To offer more efficient service to VRS and IP CTS users without risk of waste, fraud, and abuse to the TRS Fund, the Commission amended its rules to allow VRS and IP CTS providers to provide compensable service to a new user for up to two weeks after submitting the user's information to the TRS URD if the user's identity is verified within that period.

On September 30, 2022, the Commission released *Rates for Interstate Inmate Calling Services*, FCC 22–76, published at 87 FR 75496, December 9, 2022 (*Accessible Carceral Communications Order*). To improve access to communications services for incarcerated people with communications disabilities, the Commission adopted modifications to the user registration and verification requirements for use of internet-based TRS in correctional facilities.
