The BLM welcomes comments on the preliminary proposed action as well as suggestions for additional alternatives.

Planning Criteria

The planning criteria guide the planning effort and lay the groundwork for effects analysis by identifying the preliminary issues and their analytical frameworks. Preliminary issues for the planning area have been identified by BLM personnel and from early engagement conducted for this planning effort with Federal, State, and local agencies; Tribes; and other stakeholders. The BLM has identified multiple preliminary issues regarding various resources and uses for this planning effort's analysis. The planning criteria are available for public review and comment at the ePlanning website (see **ADDRESSES**).

Public Scoping Process

This notice of intent initiates the scoping period and public review of the planning criteria, which guide the development and analysis of the RMP Amendment and Environmental Analysis.

The BLM will be holding two public scoping meetings in the following locations: Taos and Santa Fe, New Mexico. One virtual meeting will also be held. The specific date and location of these scoping meetings will be announced at least 15 days in advance through media outlets, social media, and the project ePlanning website (see **ADDRESSES**).

Comments submitted during public scoping that provide pertinent information, express relevant concerns and issues, and identify reasonable management options, especially when submitted with sufficient detail, are most substantive and useful for

evaluating alternatives and conducting impact analysis.

Interdisciplinary Team

The BLM will use an interdisciplinary approach to develop the plan in order to consider the variety of resource issues and concerns identified. Specialists with expertise in the following disciplines will be involved in this planning effort: aquatic resources, archaeology, botany, ecology, environmental justice, forestry, geology, lands and realty, paleontology, outdoor recreation, rangeland management, soils, socioeconomics, visual resources, wild and scenic rivers, wilderness, wildlife and fisheries.

Additional Information

The BLM will identify, analyze, and consider mitigation to address the reasonably foreseeable impacts to resources from the proposed plan amendment and any analyzed reasonable alternatives and, in accordance with 40 CFR 1502.14(e), include appropriate mitigation measures not already included in the proposed plan amendment or alternatives. Mitigation may include avoidance, minimization, rectification, reduction or elimination over time, and compensation; and may be considered at multiple scales, including the landscape scale.

The BLM will utilize and coordinate the NEPA and land use planning processes for this planning effort to help support compliance with applicable procedural requirements under the Endangered Species Act (16 U.S.C. 1536) and Section 106 of the National Historic Preservation Act (54 U.S.C. 306108) as provided in 36 CFR 800.2(d)(3), including public involvement requirements of Section 106. The information about historic and cultural resources and threatened and endangered species within the area potentially affected by the proposed plan will assist the BLM in identifying and evaluating impacts to such resources.

The BLM will consult with Tribal Nations on a government-to-government basis in accordance with Executive Order 13175, BLM MS 1780, and other Departmental policies. Tribal concerns, including impacts on Tribal trust assets and potential impacts to cultural resources, will be given due consideration. Federal, State, and local agencies, along with Tribal Nations and other stakeholders that may be interested in or affected by the proposed approval that the BLM is evaluating, are invited to participate in the scoping process and, if eligible, may request or

be requested by the BLM to participate in the development of the environmental analysis as a cooperating agency.
