Application for a Social Security Number (SSN) Card, the Social Security Number Application Process (SSNAP), and Internet SSN Replacement Card (iSSNRC) Application—20 CFR 422.103—422.110—0960-0066. SSA collects information on the SS-5 (used in the United States) and SS-5-FS (used outside the United States) to issue original or replacement Social Security cards. SSA also enters the application data into the SSNAP application when issuing a card via telephone or in person. In addition, hospitals collect the same information on SSA's behalf for newborn children through the Enumeration at Birth (EAB) process. In this process, parents of newborns provide hospital birth registration clerks with information required to register these newborns. Hospitals send this information to State Bureaus of Vital Statistics (BVS), and they send the information to SSA's National Computer Center. SSA then uploads the data to the SSA mainframe along with all other enumeration data, and we assign the newborn a Social Security number (SSN) and issue a Social Security card.

The vast majority of applications for original SSN cards utilize EAB.

In addition, the iSSNRC internet application collects information similar to the paper SS-5 for no-change replacement SSN cards for adult U.S. citizens. The iSSNRC modality allows certain applicants for SSN replacement cards to complete the internet application and submit the required evidence online rather than completing a paper Form SS-5.

Finally, oSSNAP collects information similar to that which we collect on the paper SS-5 for no change situations, with the exception of name change, new or replacement SSN cards for U.S. Citizens (adult and minor children), and replacement cards only for non-U.S. citizens. oSSNAP allows these applicants for new or replacement SSN cards to start the application process online, receive a list of evidentiary documents, and then submit the application data to SSA for further processing by SSA employees. Applicants then visit a local SSA office to complete the application process.

In some instances, SSA collects race and ethnicity information as part of the SSN card application process. Response to the race and ethnicity questions is voluntary. SSA plans to expand the EAB process to include SSA receipt of race and ethnicity information for the newborn and parent(s) when the parent(s) consent to release of this voluntary information. Obtaining parental consent for this new data will require States and Jurisdictions to add questions to collect a newborn's race and ethnicity information. This will also require BVS to electronically share the race and ethnicity of parent(s) and newborn, for instances when the record shows the state or jurisdiction obtained parental consent, consistent with the EAB process. The respondents for this information collection are applicants for original and replacement Social Security cards, or individuals who wish to change information in their SSN records, who use any of the modalities described above.

Type of Request: Revision of an OMB-approved information collection.

 Missing and Discrepant Wage Reports Letter and Questionnaire—26 CFR

31.6051-2—0960-0432. Each year employers report the wage amounts they paid their employees to the Internal Revenue Service (IRS) for tax purposes, and separately to SSA for retirement and disability coverage purposes. Employers should report the same figures to SSA and the IRS; however, each year some of the employer wage reports SSA receives show wage amounts lower than those employers report to the IRS. SSA uses Forms SSA-L93-SM, SSA-L94-SM, SSA-95-SM, and SSA-97-SM to ensure employees

receive full credit for their wages. SSA is also creating the online IRS/SSA Reconciliation which is a streamlined version of the SSA-95-SM and the SSA-97-SM. The IRS/SSA Reconciliation will guide employers to the appropriate solutions and will link the users to on-line tools to correct issues. The respondents are employers who reported lower wage amounts to SSA than they reported to the IRS.
Type of Request: Revision of an OMB-approved information collection.
