

comparability of data; and standardized means to collect information and statistics.

Nominees will be selected based on expertise in fields associated with statistical, demographic, and epidemiological research, such as biostatistics/biometry, survey methodology and polling, sociology, reproductive health, minority health, nutrition, social and behavioral health sciences, and population-based public and environmental health; public health practice, e.g., state and local health data systems; operations research, health policy, and health services research, including health economics and econometrics; provision of health services, e.g., medicine, nursing, rehabilitation, other allied health care, and preventive medicine; health quality measurement and health indicators; health promotion; medical informatics; and data and health information security, storage, confidentiality, and dissemination.

The Board makes recommendations about opportunities for NCHS programs to examine and employ new approaches to monitoring and evaluating key public health, health policy, and public policy changes. This includes automation, data modernization, and technological improvements to enhance data collection, analysis, access, and reporting capabilities of the Center. Members of the BSC, NCHS are responsible for surveying the state-of-the-art of their respective disciplines, and reporting, as appropriate, to the full Board and recommending convening of workshops or symposia to educate or update all Board members.

The selection of members is based on candidates' qualifications to contribute to accomplishing BSC, NCHS objectives (<https://www.cdc.gov/nchs/about/bsc.htm>). Members may be invited to serve for up to four-year terms.

Department of Health and Human Services (HHS) policy stipulates that committee membership be balanced in terms of points of view represented and the committee's function. Appointments shall be made without discrimination on the basis of age, race, ethnicity, gender, sexual orientation, gender identity, HIV status, disability, and cultural, religious, or socioeconomic status. Nominees must be U.S. citizens and cannot be full-time employees of the U.S. Government. Current participation on federal workgroups or prior experience serving on a federal advisory committee does not disqualify a candidate; however, HHS policy is to avoid excessive individual service on advisory committees and multiple committee memberships. Board

members are Special Government Employees, requiring the filing of financial disclosure reports at the beginning of and annually during their terms. The Centers for Disease Control and Prevention (CDC) reviews potential candidates for BSC, NCHS membership each year and provides a slate of nominees for consideration to the Secretary of HHS for final selection. HHS notifies selected candidates of their appointment near the start of the term in June, or as soon as the HHS selection process is completed. Note that the need for different expertise varies from year to year and a candidate who is not selected in one year may be reconsidered in a subsequent year. Candidates should submit the following items:

- Cover letter that includes a statement of interest for serving on the Board and the names of two professional references. Candidates may submit references from current HHS employees if they wish, but at least one reference must be submitted by a person not employed by an HHS agency (e.g., CDC, Health Resources and Services Administration, National Institutes of Health, Agency for Healthcare Research and Quality).
- Current resume/curriculum vitae, including complete contact information (telephone numbers, work and home postal mailing addresses, email address) in Microsoft Word or PDF format.
- Short biographical sketch, including the top 3–5 areas of expertise.

Nominations may be submitted by the candidate or by the person/organization recommending the candidate.

The Director, Office of Strategic Business Initiatives, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Office of Strategic Business Initiatives, Centers for Disease Control and Prevention.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60-Day–23–23HM; Docket No. CDC–2023–0071]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Assessing Fatigue and Fatigue Management in U.S. Onshore Oil and Gas Extraction. This study is designed to examine oil and gas extraction workers' determinants of fatigue and fatigue mitigation strategies.

DATES: CDC must receive written comments on or before October 20, 2023.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2023–0071 by either of the following methods:

- *Federal eRulemaking Portal:* www.regulations.gov. Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS–H21–8, Atlanta, Georgia 30329.

- *Instructions:* All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to www.regulations.gov.

Please note: Submit all comments through the Federal eRulemaking portal (www.regulations.gov) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

Assessing Fatigue and Fatigue Management in U.S. Onshore Oil and Gas Extraction—New—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Oil and gas extraction (OGE) workers play an important role in supporting the United States economy and help fulfill the energy needs of Americans and American businesses. OGE workers have significant risks for a variety of

exposures at oil and gas well sites. There has been no significant fatigue research in the United States onshore upstream OGE sector. This proposed project will characterize relationships between sleep, alertness, fatigue, fatigue management, and related factors, within the onshore OGE industry. Primary data will be collected using three approaches. First, researchers will collect direct measurements of sleep and alertness among OGE workers. Second, researchers will use questionnaires to collect information on OGE worker demographics, occupation, general health, normal working hours, commute times, physical sleeping environment, and typical sleep quality. Third, researchers will collect qualitative information through interviews with workers, front-line supervisors, health and safety leaders, as well as subject matter experts, to understand challenges and opportunities related to fatigue management in OGE.

CDC requests OMB approval for an estimated 404 annual burden hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

| Type of respondents | Form name | Number of respondents | Number of responses per respondent | Average burden per response (in hours) | Total burden (in hours) |
|---------------------------------|---------------------------------------|-----------------------|------------------------------------|--|-------------------------|
| Land-based OGE workers | Baseline Questionnaire | 80 | 1 | 15/60 | 20 |
| Land-based OGE workers | Daily Pre-Shift Questionnaires | 80 | 14 | 3/60 | 56 |
| Land-based OGE workers | Daily Post-Shift Questionnaires | 80 | 14 | 3/60 | 56 |
| Land-based OGE workers | Psychomotor Vigilance Test (PVT) .. | 80 | 28 | 5/60 | 187 |
| Land-based OGE workers | Actigraphy | 80 | 1 | 15/60 | 20 |
| Land-based OGE workers | Worker Interview Guide | 30 | 1 | 1.5 | 45 |
| Field-level Supervisors | Manager Interview Guide | 10 | 1 | 1 | 10 |
| Health and Safety Leaders | HSE Interview Guide | 7 | 1 | 1 | 7 |
| Subject Matter Experts | SME Interview Guide | 3 | 1 | 1 | 3 |
| Total | | | | | 404 |

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–23–1373; Docket No. CDC–2023–0069]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of

its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Fire Fighter Fatality Investigation and Prevention Program (FFFIPP) Survey. This data collection will evaluate fire department implementation of the NIOSH FFFIPP recommendations, and assess whether NIOSH FFFIPP recommendations are utilized by fire departments to identify barriers to implementation of
