

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

Assessing Fatigue and Fatigue Management in U.S. Onshore Oil and Gas Extraction—New—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Oil and gas extraction (OGE) workers play an important role in supporting the United States economy and help fulfill the energy needs of Americans and American businesses. OGE workers have significant risks for a variety of

exposures at oil and gas well sites. There has been no significant fatigue research in the United States onshore upstream OGE sector. This proposed project will characterize relationships between sleep, alertness, fatigue, fatigue management, and related factors, within the onshore OGE industry. Primary data will be collected using three approaches. First, researchers will collect direct measurements of sleep and alertness among OGE workers. Second, researchers will use questionnaires to collect information on OGE worker demographics, occupation, general health, normal working hours, commute times, physical sleeping environment, and typical sleep quality. Third, researchers will collect qualitative information through interviews with workers, front-line supervisors, health and safety leaders, as well as subject matter experts, to understand challenges and opportunities related to fatigue management in OGE.

CDC requests OMB approval for an estimated 404 annual burden hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Land-based OGE workers	Baseline Questionnaire	80	1	15/60	20
Land-based OGE workers	Daily Pre-Shift Questionnaires	80	14	3/60	56
Land-based OGE workers	Daily Post-Shift Questionnaires	80	14	3/60	56
Land-based OGE workers	Psychomotor Vigilance Test (PVT) ..	80	28	5/60	187
Land-based OGE workers	Actigraphy	80	1	15/60	20
Land-based OGE workers	Worker Interview Guide	30	1	1.5	45
Field-level Supervisors	Manager Interview Guide	10	1	1	10
Health and Safety Leaders	HSE Interview Guide	7	1	1	7
Subject Matter Experts	SME Interview Guide	3	1	1	3
Total	404

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–23–1373; Docket No. CDC–2023–0069]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of

its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Fire Fighter Fatality Investigation and Prevention Program (FFFIPP) Survey. This data collection will evaluate fire department implementation of the NIOSH FFFIPP recommendations, and assess whether NIOSH FFFIPP recommendations are utilized by fire departments to identify barriers to implementation of

recommendations and to identify areas for potential intervention projects.

DATES: CDC must receive written comments on or before October 20, 2023.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2023–0069 by either of the following methods:

- *Federal eRulemaking Portal:* www.regulations.gov. Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without charge, all relevant comments to www.regulations.gov.

Please note: Submit all comments through the Federal eRulemaking portal (www.regulations.gov) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary

for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

Fire Fighter Fatality Investigation and Prevention Program (FFFIPP) Survey (OMB Control No. 0920–1373, Exp. 10/31/2023)—Extension—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Fire Fighter Fatality Investigation and Prevention Program (FFFIPP) conducts independent investigations of fire fighter (FF) line-of-duty deaths (LODD) and recommends ways to prevent deaths and injuries. In 2003, an evaluation was conducted to determine the extent to which recommendations from NIOSH investigations of FF fatalities are being implemented by fire departments (FDs). Since then, there have been changes to the Program recommendations and methods of disseminating FFFIPP reports. For example, there have been changes to: (1) the details and types of recommendations for preventing FF fatalities; and (2) the method to disseminate the FFFIPP reports to FDs (driven in large part by cost). Dissemination methods have evolved from hardcopy mailings to FDs, to internet-based, with notifications of new FFFIPP reports by the fire service media and if FDs sign-up at the NIOSH website for notifications of new reports.

Understanding how, or if NIOSH recommendations are used by various

types of FDs will allow a better understanding of barriers to the use of proven prevention recommendations and help identify approaches to improve the delivery of services to FDs. Additionally, we will gain insight into whether changes to the communication and dissemination have impacted the reach of these recommendations. Knowing if different types of FDs are aware of and willing to access FFFIPP reports and recommendations in non-print formats is critical, as these recommendations cannot have the intended impact of saving FF lives if large numbers of FDs do not know where to find NIOSH reports or have the resources to access them.

The purpose of this data collection is to assess FD implementation of the NIOSH FFFIPP recommendations and identify barriers to implementation of recommendations. Results will provide an understanding of current FD operational procedures, insight into MV-related activities and related policies, and identify whether FFFIPP recommendations are being utilized by FDs. Findings will inform strategies for communication of future recommendations and identify areas for potential intervention projects in order to improve the delivery of services and help ensure an effective and efficient stakeholder experience with the Program. The estimate for burden hours is based on a pilot test of the survey instrument by eight FD personnel. In the pilot test, the average time to complete the survey, including time for reviewing instructions, gathering needed information, and completing the survey was 10–25 minutes. There are screening questions at the beginning of the survey so all respondents may not actually participate. The respondent universe is based on: (1) 4,500 fire departments; (2) eight strata (region, department type); and (3) position (FF, chief, company officer). An estimated 13,500 respondents are anticipated to participate in the survey; the annual respondent burden is estimated to be 4,050 hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Firefighters (FF)	Survey	4,500	1	18/60	1,350

ESTIMATED ANNUALIZED BURDEN HOURS—Continued

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Fire Chiefs	Survey	4,500	1	18/60	1,350
Company Officers	Survey	4,500	1	18/60	1,350
Total	4,050

 Prevention**

[60Day–23–22FZ; Docket No. CDC–2023–
 0072]

**Proposed Data Collection Submitted
 for Public Comment and
 Recommendations**

AGENCY: Centers for Disease Control and
 Prevention (CDC), Department of Health
 and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease
 Control and Prevention (CDC), as part of
 its continuing effort to reduce public
 burden and maximize the utility of
 government information, invites the
 general public and other Federal
 agencies the opportunity to comment on
 a proposed and/or continuing
 information collection, as required by
 the Paperwork Reduction Act of 1995.
 This notice invites comment on a
 proposed information collection project
 titled *mChoice: Improving PrEP Uptake
 and Adherence among Minority MSM
 through Tailored Provider Training and
 Adherence Assistance in Two High
 Priority Settings*. The collection is part
 of a research study designed to
 implement and evaluate the
 effectiveness of an intervention that
 utilizes evidence-based education and
 support tools to improve preexposure
 prophylaxis (PrEP) adherence among
 young men who have sex with men
 (YMSM).

DATES: CDC must receive written
 comments on or before October 20,
 2023.

ADDRESSES: You may submit comments,
 identified by Docket No. CDC–2023–
 0072 by either of the following methods:

Federal eRulemaking Portal:
www.regulations.gov. Follow the
 instructions for submitting comments.
 Mail: Jeffrey M. Zirger, Information
 Collection Review Office, Centers for
 Disease Control and Prevention, 1600
 Clifton Road NE, MS H21–8, Atlanta,
 Georgia 30329.

Instructions: All submissions received
 must include the agency name and
 Docket Number. CDC will post, without
 change, all relevant comments to
www.regulations.gov.

Please note: Submit all comments
 through the Federal eRulemaking portal
 (www.regulations.gov) or by U.S. mail to
 the address listed above.

FOR FURTHER INFORMATION CONTACT: To
 request more information on the
 proposed project or to obtain a copy of
 the information collection plan and
 instruments, contact Jeffrey M. Zirger,
 Information Collection Review Office,
 Centers for Disease Control and
 Prevention, 1600 Clifton Road NE, MS
 H21–8, Atlanta, Georgia 30329;
 Telephone: 404–639–7118; Email: [omb@
 cdc.gov](mailto:omb@cdc.gov).

SUPPLEMENTARY INFORMATION: Under the
 Paperwork Reduction Act of 1995 (PRA)
 (44 U.S.C. 3501–3520), Federal agencies
 must obtain approval from the Office of
 Management and Budget (OMB) for each
 collection of information they conduct
 or sponsor. In addition, the PRA also
 requires Federal agencies to provide a
 60-day notice in the **Federal Register**
 concerning each proposed collection of
 information, including each new
 proposed collection, each proposed
 extension of existing collection of
 information, and each reinstatement of
 previously approved information
 collection before submitting the
 collection to the OMB for approval. To
 comply with this requirement, we are
 publishing this notice of a proposed
 data collection as described below. The
 OMB is particularly interested in
 comments that will help:

1. Evaluate whether the proposed
 collection of information is necessary
 for the proper performance of the
 functions of the agency, including
 whether the information will have
 practical utility;

2. Evaluate the accuracy of the
 agency’s estimate of the burden of the
 proposed collection of information,
 including the validity of the
 methodology and assumptions used;

3. Enhance the quality, utility, and
 clarity of the information to be
 collected;

4. Minimize the burden of the
 collection of information on those who
 are to respond, including through the
 use of appropriate automated,
 electronic, mechanical, or other
 technological collection techniques or
 other forms of information technology,
e.g., permitting electronic submissions
 of responses; and

5. Assess information collection costs.

Proposed Project

*mChoice: Improving PrEP Uptake and
 Adherence among Minority MSM
 through Tailored Provider Training and
 Adherence Assistance in Two High
 Priority Settings—New—National
 Center for HIV/AIDS, Viral Hepatitis,
 STD, and TB Prevention (NCHHSTP),
 Centers for Disease Control and
 Prevention (CDC).*

Background and Brief Description

The National Center for HIV/AIDS,
 Viral Hepatitis, STD and TB Prevention
 is requesting approval for 36 months of
 data collection titled, “*mChoice:
 Improving PrEP Uptake and Adherence
 among Minority MSM through Tailored
 Provider Training and Adherence
 Assistance in Two High Priority
 Settings.*” The purpose of this study is
 to implement and evaluate the
 effectiveness of a clinic-based
 intervention that utilizes evidence-
 based education and support tools to
 improve preexposure prophylaxis
 (PrEP) adherence among young men
 who have sex with men (YMSM). The
 goals of this research study are to: (1)
 improve the overall PrEP experience of
 providers and YMSM patients; and (2)
 increase our understanding of provider
 and patient factors that influence the
 choice of PrEP regimen by MSM in
 clinical settings. This study will be
 carried out in four clinics in New York,
 NY (two clinics) and Birmingham, AL
 (two clinics).
