The Commission's Rules of Practice require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application has been accepted for filing and is now ready for environmental analysis.

The Council on Environmental Quality (CEQ) issued a final rule on April 20, 2022, revising the regulations under 40 CFR parts 1502, 1507, and 1508 that Federal agencies use to implement the National Environmental Policy Act (NEPA) (see National Environmental Policy Act Implementing Regulations Revisions, 87 FR 23453-70). The final rule became effective on May 20, 2022. Commission staff intends to conduct its NEPA review in accordance with CEQ's new regulations.

l. *The Christine Falls Project consists of the following existing facilities:* (1) a

15-foot-high, 152.6-foot-long concrete gravity dam (includes both abutments), with 3-foot-high wooden flashboards installed along the crest of the 135-foot-long spillway; (2) a reservoir with a surface area of 1.1 acres and a storage capacity of 4-acre feet at a normal water surface elevation of 1,699.7 feet National Geodetic Vertical Datum of 1929 (NGVD29); (3) an intake structure; (4) a 613-foot-long steel penstock with a diameter of 6 feet that bifurcates into 3-foot-diameter, 45-foot-long and 4-foot-diameter, 32-foot-long penstocks; (5) a brick and concrete powerhouse containing two turbine-generator units (*i.e.*, one 275-kilowatt (kW) unit and one 575-kW unit) with a total capacity of 850 kW; (7) a tailrace with a depth of 21 feet; (8) a 610-foot-long bypassed reach; (9) a 185-foot-long underground transmission line connecting the generating units to a 1,000-kilovolt-ampere step-up transformer; (10) a 9,315-foot-long, 4.16/13.2-kilovolt underground transmission line from the transformer to a point of interconnection; and (11) appurtenant facilities.

The Christine Falls Project is operated in a run-of-river mode, with a minimum flow of 25 cubic feet per second (cfs) into the bypassed reach during the months of March, April, and May, and a minimum flow of 10 cfs during the remainder of the year. The project has an average annual generation of 2,478 megawatt-hours.

Ampersand proposes to operate the project in a strict run-of-river mode with an impoundment level fluctuation limit of 3 inches from the dam crest or flashboards when in place. As described in its October 11, 2022, settlement agreement with the U.S. Fish and Wildlife Service, New York State Department of Environmental Conservation, American Whitewater, and the New York State Council of Trout Unlimited, Ampersand proposes the following changes to project operation and facilities: (1) providing two seasonal minimum flow regimes over the spillway and through the bypass gate: (a) a 15-cubic foot per second (cfs) minimum flow or inflow, whichever is less, from June 1 to October 31, and (b) a 35-cfs minimum flow or inflow, whichever is less, from November 1 to May 31; (2) installing trash racks with 1-inch clear spacing or the equivalent (*e.g.*, an overlay-type system) whereby approach velocities are less than or equal to 2 feet per second, as measured 1 foot in front of the trash racks; and (3) installing and maintaining a year-round downstream fish passage structure. Ampersand also proposes to remove the existing 9,315-foot-long

transmission line from the project, stating that the line also provides power to the project from the grid and thus should not be considered a primary transmission line.

All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. A copy of all other filings in reference to this application must be accompanied by proof of service on all
