

(b) The agency head shall ensure that any person granted access has been fully informed of and agreed to these conditions.

(c) Any prerelease of information under an embargo shall not precede the official release time by more than 30 minutes.

(d) In all cases, prerelease access shall precede the official release time only to the extent necessary for an orderly review of the data.

All employees of the Executive Branch who receive prerelease distribution of information and data estimates as authorized above are responsible for assuring that there is no release prior to the official release time. Except for members of the staff of the agency issuing the principal economic indicator who have been designated by the agency head to provide technical explanations of the data, employees of the Executive Branch shall not comment publicly on the data until *at least one hour after the official release time*.

Under OMB's proposal, the italicized text would be changed to "*at least thirty minutes after the official release time.*"

Any changes to the text from Section 5 would neither affect nor replace any of the other standards and guidelines articulated in Directive No. 3.

Request for comments. OMB seeks comments from all interested parties, including data users, businesses, organizations, and the media. Specifically, OMB seeks comments from the public about the proposal to change the delay from one hour to thirty minutes, including whether such a change could still meet the goals of Directive No. 3 to ensure equitable, policy-neutral, and timely release and dissemination of PFEIs. OMB also seeks input on whether to maintain the one-hour delay.

Richard L. Revez,

Administrator, Office of Information and Regulatory Affairs.

SUPPLEMENTARY INFORMATION:

I. Abstract

This information collection enabled NASA to pre-test methods to collect information from individuals to determine community response to the new, quieter sonic booms, prior to the start of flight testing the X-plane. No public exposure to any form of sonic boom occurred during the pre-testing phase.

The pre-test was conducted by telephone interview. NASA wanted to evaluate telephone surveys to assess prompt public response associated with experiencing low amplitude sonic booms over multiple, geographically dispersed communities. Responses were voluntary.

The new X-plane is designed to produce low amplitude sonic booms. Ultimately, flight testing of the X-plane is intended to (1) demonstrate and validate the technology necessary for civil supersonic flights that create low amplitude sonic booms, and (2) assess community response to the new, quieter, sonic booms.

60-Day Notice for the "Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery"

AGENCY: National Endowment for the Arts.

ACTION: Notice of proposed collection; comment request.

SUMMARY: The National Endowment for the Arts (NEA), as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the NEA is soliciting comments concerning the proposed information collection for Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery. A copy of the current information collection request can be obtained by contacting the office listed below in the address section of this notice.

DATES: Written comments must be submitted to the office listed in the address section below within 60 days from the date of this publication in the **Federal Register**.
