According to the verified notice, WIM has entered into an operating agreement with BLPI RR. WIM further states that it will interchange with the Spokane, Spangle & Palouse Railway (SS&P) at SS&P's connection with the Line at the Washington/Idaho state line or at another location near Palouse, Wash., as WIM and SS&P may agree.

This transaction is related to a concurrently filed verified notice of exemption in *Howell—Continuance of Control Exemption—Washington, Idaho & Montana Railway*, Docket No. FD 36708, in which the John Howell seeks to continue in control of WIM upon WIM's becoming a Class III rail carrier.

WIM certifies that its annual projected revenues as a result of the transaction will not exceed those that would qualify it as a Class III carrier and will not exceed \$5 million. WIM also states that the operation agreement does not involve a provision or agreement that would limit future interchange with a third-party connecting carrier.

The effective date of this exemption is September 8, 2023 (30 days after the verified notice was filed).² WIM indicates in the verified notice that it and BLPI RR seek to commence service on the Line as soon as possible. The parties are reminded that WIM may not consummate the transaction described in this notice until after the effective date of the related continuance in

¹ See *BLPI RR L.L.C.—Acquis. & Operation Exemption—Palouse River & Coulee City R.R.*, FD 36706 (STB served July 7, 2023).

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval for a renewed information collection. The **Federal Register** Notice with a 60-day comment period soliciting

The collection involves a request that airplane operators subject to the applicability of Annex 16, Volume IV of the Convention on Civil Aviation (hereinafter the "Chicago Convention") submit electronically an Emissions Monitoring Plan (EMP), an annual Emissions Report (ER), and an optional annual ER CORSIA Eligible Fuels Annex (CEFA) to the FAA. The information to be collected is necessary because FAA will use the information to fulfill the United States' responsibilities under the Chicago Convention.

DATES: Written comments should be submitted by September 25, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. OMB Control Number: 2120-0790.

Title: CORSIA Monitoring, Reporting, and Verification (MRV) Program.

Form Numbers: 1. Emissions Monitoring Plan (EMP) Template; 2. Emissions Report (ER) Template; 3. ER CORSIA Eligible Fuels Annex (CEFA).

Type of Review: Clearance of a renewal of an information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on January 25, 2023 (88 FR 4878). FAA received two comments in response to this notice.

The CORSIA MRV Program is a voluntary program for certain U.S. air carriers and commercial operators (collectively referred hereinafter as "operators") to submit certain airplane CO₂ emissions data to the FAA to enable

the United States to establish uniformity with ICAO Standards And Recommended Practices (SARPs) for CORSIA, which were adopted in June 2018, as Annex 16, Volume IV to the Chicago Convention. The United States supported the decision to adopt the CORSIA SARPs based on the understanding that CORSIA is the exclusive market-based measure applying to international aviation, and that CORSIA will ensure fair and reciprocal commercial competition by avoiding a patchwork of country- or regionally-based regulatory measures that are inconsistently applied, bureaucratically costly, and economically damaging. Furthermore, continued U.S. support for CORSIA assumes a high level of participation by other countries, particularly by countries with significant aviation activity, as well as a final CORSIA package that is acceptable to, and implementable by, the United States.

Under CORSIA, all ICAO Member States whose airplane operators undertake international flights were required to develop an MRV system for CO₂ emissions from those international flights starting January 1, 2019. The FAA's CORSIA MRV Program is intended to be the United States' MRV system for monitoring, reporting, and verification of U.S. airplane operator CO₂ emissions from international flights. Operators that are subject to the applicability of CORSIA will submit their EMPs, ERs, and optional ER CEFA's electronically.¹

Each document use Microsoft Excel-based templates and can be transmitted via email. EMPs that are submitted by operators will be used as a collaborative tool between the operator and FAA to document a given operator's chosen fuel use monitoring procedures. FAA will retain a copy of the EMP and will share with ICAO a list of operators that submit EMPs. FAA will not submit any specific EMPs from U.S. operators to ICAO. Large operators, *i.e.*, those emitting 500,000 metric tons or more of CO₂ per

¹ CORSIA applies to airplane operators that produce annual CO₂ emissions greater than 10,000 tonnes (*i.e.*, 10,000 metric tons) from international flights, excluding emissions from excluded flights. The following activities are excluded CORSIA:

- Domestic flights;
- Humanitarian, medical, and firefighting operations, including flight(s) preceding or following a humanitarian, medical, or firefighting flight provided such flight(s) were conducted with the same airplane, were required to accomplish the related humanitarian, medical, or firefighting activities or to reposition thereafter the airplane for its next activity;

- Operations using an airplane with a maximum certificated take-off mass equal to or less than 5,700 kg;

- Operations on behalf of the military.
