SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new information collection, which will include focus groups and pre-test to help guide revisions necessary to the survey instrument, to directly support decision-makers with the National Estuarine Research Reserve (NERR). The proposed data collection involves surveying randomly selected residents (aged 18 years and older) from households in counties surrounding the NERRs. The purpose of this information collection is to obtain data on the opinions, values, attitudes, and behaviors of visitors to National Ocean Service (NOS) special places, as well as residents from surrounding areas. The initial surveys will be conducted for the Chesapeake Bay National Estuarine Research Reserve in Virginia (CBNERR-VA), Weeks Bay NERR (WBNERR), and Grand Bay NERR (GNDNERR), and the survey will be repeated regularly in other NERRs based on information needs and budget.

The NERRS is a federal-state partnership program for the stewardship, education, and research of unique estuarine sites. This data collection supports the NERRS' vision of establishing healthy estuaries and coastal watersheds where human and ecological communities thrive. The NERRS has identified five priority research areas, including a focus on social science and economic processes within each NERR site. However, limited data exist characterizing stakeholder activities, attitudes, knowledge, and preferences, including their spatial aspects. Gathering such data is essential for effective management of stakeholder groups, regulatory proposals, and resource management decisions.

Designated in 1986, WBNERR is located along the eastern shore of Mobile Bay in Baldwin County, Alabama. CBNERR-VA, designated in 1991, comprises four reserve sites within the York River in the southern Chesapeake Bay subregion. Finally, GNDNERR was established in 1999 and is in the Grand Bay Savannah Complex along the Mississippi-Alabama state line

in Jackson County, Mississippi. All three NERRS prioritize public access and responsible use to protect ecosystems, identifying public sites, minimizing conflicts, and evaluating visitor use. Therefore, information is needed on who uses these NERR sites, their motivations, management preferences, and why some do not visit. This data supports conservation and management goals, strengthens decision-making, increases capacity, and extends education and outreach. It is also required by NOAA to meet objectives related to ocean and coastal planning and management. The data benefits state and local officials as well.

NOAA's mission is to provide science, service and stewardship for, among other activities, management of the nation's oceans and coasts. NOAA supports "comprehensive ocean and coastal planning and management" in order to facilitate use of oceans and coasts, while also ensuring "continued access to coastal areas, sustained ecosystems, maintained cultural heritage, and limited cumulative impacts." NOAA is subject to and supports mandates of the Coastal Zone Management Act (CZMA) (16 U.S.C. 1452(303)(2)(D)), which encourages the wise use of coastal resources, including energy activity. The CZMA also encourages the inclusion and participation of the public in carrying out the tenets of the act (16 U.S.C. 1452(303)(4)). The National Environmental Policy Act (NEPA) (40 CFR 1502.6) mandates federal agencies to use social science data to assess the impacts of federal actions on the human environment. Consequently, up-to-date sociological data is needed to support federal agency obligations under each of these acts.

Finally, NOAA is responding to Executive Orders 13707 and 13985. Executive Order 13707, Using Behavioral Science Insights to Better Serve the American People, requests federal agencies to, among other actions: "identify policies, programs, and operations where applying behavioral science insights may yield substantial improvements in public welfare, program outcomes, and program cost effectiveness" and "develop strategies for applying behavioral science insights to programs and, where possible, rigorously test and evaluate the impact of these insights." Executive Order 13985, On Advancing Racial Equity and Support for Underserved Communities Through the Federal Government, requires the federal government to allocate resources "in a manner that increases investment in underserved

communities, as well as individuals from those communities."

II. Method of Collection

Information will be collected with a combination of mail recruitment with push-to-web and mail-back survey instrument.
