### Cultural Affiliation

The human remains and associated funerary objects in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: archeological, geographical, oral traditional, and museum records.

### Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, the Gilcrease Museum has determined that:

- The human remains described in this notice represent the physical remains of 56 individuals of Native American ancestry.
- The 102 objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a relationship of shared group identity that can be reasonably traced between the human remains and associated funerary objects described in this notice and the Caddo Nation of Oklahoma.

### Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the Responsible Official identified in ADDRESSES. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after September 27, 2023. If competing requests for repatriation are received, the Gilcrease Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not

competing requests. The Gilcrease Museum is responsible for sending a copy of this notice to the Indian Tribe identified in this notice.

### Description

A minimum of two ancestors were removed from Clark County, NV. Sometime in the mid-1970s (the exact date is unclear), California State University, Los Angeles conducted excavations at the CK2003 Mill Point #1 site, also referred to as the Fremont Point site. The descriptions of the two burials are based on a 1994 osteological report from Judy M. Suchey of the Department of Anthropology at California State University, Fullerton and a 2005 NAGPRA inventory, likely completed by Patricia Martz of the Department of Anthropology at California State University, Los Angeles. Burial 1 is a nearly complete burial of an estimated female over 30 years of age who was between 4' 11" and 5' 2" in stature. Marked vertebral lipping and heavy dental attrition and alveolar resorption were noted. Burial 2 is a nearly complete burial of an estimated female over 30 years of age who was between 5' 4" and 5' 7" in stature. Heavy vertebral lipping on the lower thoracic and lumbar vertebrae and minimal dental attrition on the maxillary teeth were noted. None of the current faculty at California State University, Los Angeles has conducted any analyses on these ancestors. No associated funerary objects are present.

Based on documentation in the Department of Anthropology, California State University, Los Angeles, officials at California State University, Fullerton determined that the CK2003 Mill Point #1 site dates to A.D. 530–1070. A site report from 1979 by R.F. Perkins indicates a radiocarbon-14 date of A.D. 680.

### Cultural Affiliation
