

Following NOAA's review of the relevant information, it was determined that there are still significant threats to the area, and it is still an area of national significance. However, there is not currently demonstrated broad community support for the nomination remaining on the inventory of possible designations. ONMS has also determined that it is not clear, at this time, how a sanctuary designation would supplement or complement existing management and regulatory authorities for the Marianas Trench. Therefore, and in consideration of the nominating organization's request to withdraw the nomination, the ONMS Director has determined the nomination for the Mariana Trench NMS should not remain on the inventory of successful nominations.
