SUPPLEMENTARY INFORMATION:

Agenda

The joint SSC Subpanel, comprised of SSC members from both the New England and Mid-Atlantic Fishery Management Councils, will meet to review methods for designating Essential Fish Habitat (EFH) and Habitat Areas of Particular Concern (HAPC). The review will address the following topics: (1) principles applied to improving EFH and HAPC designations; (2) methods for developing EFH text and maps including application of model-based approaches; (3) methods for identifying HAPC; and (4) recommendations for additional near- or longer-term work that might improve EFH or HAPC designations. The subpanel will provide a report summarizing their input. This input will be provided directly to the Mid-Atlantic Fishery Management Council's EFH Fishery Management Action Team, the New England Fishery Management Council's Habitat Plan Development Team, as well as the New England and Mid-Atlantic Fishery Management Councils. There will be opportunities for public input and comment.

Although non-emergency issues not contained on the agenda may come before this panel for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.
