

application for an allocation of tax credits.

(Case B) Project B is located in a 2024 DDA that is NOT a designated DDA in 2025 or 2026. A complete application for tax credits for Project B is filed with the allocating agency on December 1, 2024. Credits are allocated to Project B on March 30, 2027. Project B is NOT eligible for the increase in basis accorded a project in a 2024 DDA because, although the application for an allocation of tax credits was filed BEFORE January 1, 2025 (the assumed effective date of the 2025 DDA lists), the tax credits were allocated later than the end of the 730-day period after the filing of the complete application.

(Case C) Project C is located in a 2024 DDA that was not a DDA in 2023. Project C was placed in service on November 15, 2023. A complete application for tax-exempt bond financing for Project C is filed with the bond-issuing agency on January 15, 2024. The tax-exempt bonds that will support the permanent financing of Project C are issued on September 30, 2024. Project C is NOT eligible for the increase in basis otherwise accorded a project in a 2024 DDA, because the project was placed in service BEFORE January 1, 2024.

(Case D) Project D is located in an area that is a DDA in 2024 but is NOT a DDA in 2025 or 2026. A complete application for tax-exempt bond financing for Project D is filed with the bond-issuing agency on October 30, 2024. Tax-exempt bonds are issued for Project D on April 30, 2026, but Project D is not placed in service until January 30, 2027. Project D is eligible for the increase in basis available to projects located in 2024 DDAs because: (1) one of the two events necessary for triggering the effective date for buildings described in section 42(h)(4)(B) of the IRC (the two events being tax-exempt bonds issued and buildings placed in service) took place on April 30, 2026, within the 730-day period after a complete application for tax-exempt bond financing was filed, (2) the application was filed during a time when the location of Project D was in a DDA, and (3) both the issuance of the tax-exempt bonds and placement in service of Project D occurred after the application was submitted.

(Case E) Project E is a multiphase project located in a 2024 DDA that is NOT a designated DDA or QCT in 2025. The first phase of Project E received an allocation of credits in 2024, pursuant to an application filed March 15, 2024, which describes the multiphase composition of the project. An application for tax credits for the second phase of Project E is filed with the

allocating agency by the same entity on March 15, 2025. The second phase of Project E is located on a contiguous site. Credits are allocated to the second phase of Project E on October 30, 2025. The aggregate amount of credits allocated to the two phases of Project E exceeds the amount of credits that may be allocated to an applicant in one year under the allocating agency's QAP and is the reason that applications were made in multiple phases. The second phase of Project E is, therefore, eligible for the increase in basis accorded a project in a 2024 DDA, because it meets all of the conditions to be a part of a multiphase project.

(Case F) Project F is a multiphase project located in a 2024 DDA that is NOT a designated DDA in 2025 or 2026. The first phase of Project F received an allocation of credits in 2024, pursuant to an application filed March 15, 2024, which does not describe the multiphase composition of the project. An application for tax credits for the second phase of Project F is filed with the allocating agency by the same entity on March 15, 2026. Credits are allocated to the second phase of Project F on October 30, 2026. The aggregate amount of credits allocated to the two phases of Project F exceeds the amount of credits that may be allocated to an applicant in one year under the allocating agency's QAP. The second phase of Project F is, therefore, NOT eligible for the increase in basis accorded a project in a 2024 DDA, since it does not meet all of the conditions for a multiphase project, as defined in this notice. The original application for credits for the first phase did not describe the multiphase composition of the project. Also, the application for credits for the second phase of Project F was not made in the year immediately following the first phase application year.

(Case G) Project G is located in an area that is NOT a DDA in 2024 or 2026, but is in a DDA in 2025. A complete application for tax-exempt bond financing for Project G is filed with the bond-issuing agency on October 30, 2024. Project G is placed in service on November 15, 2025 and the bonds are issued on February 20, 2026. Property G is eligible for the increase in basis available to projects located in 2025 DDAs because one of the two necessary actions (the two events being tax-exempt bonds issued and buildings placed in service) occur when the property is in a DDA and both events occur after January 1, 2025, the assumed effective date of the 2025 DDAs.

VIII. Findings and Certifications

A. Environmental Impact

This notice involves the statutorily required establishment of fiscal requirements or procedures that are related to rate and cost determinations and do not constitute a development decision affecting the physical condition of specific project areas or building sites. Accordingly, under 24 CFR 50.19(c)(6) of HUD's regulations, this notice is categorically excluded from environmental review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321, *et seq.*).

B. Federalism Impact

Executive Order 13132 (entitled "Federalism") prohibits an agency from publishing any policy document that has federalism implications if the document either imposes substantial direct compliance costs on State and local governments and is not required by statute, or the document preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the executive order. This notice merely designates DDAs and QCTs as required under IRC section 42, as amended, for the use by political subdivisions of the States in allocating the LIHTC. This notice also details the technical methods used in making such designations. As a result, this notice is not subject to review under the order.
