Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries; General Category October Through November Time Period Quota Transfer

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; quota transfer.

SUMMARY: NMFS is transferring 25 metric tons (mt) of Atlantic bluefin tuna (BFT) quota from the Reserve category to the General category October through November time period resulting in an adjusted October through November time period subquota of 117.4 mt and a Reserve category quota of 87.2 mt. This action would affect Atlantic Tunas General category (commercial) permitted vessels and Highly Migratory Species (HMS) Charter/Headboat permitted vessels with a commercial sale endorsement when fishing commercially for BFT.

DATES: The transfer is effective September 28, 2023, through November 30, 2023.

FOR FURTHER INFORMATION CONTACT: Lisa Crawford, lisa.crawford@noaa.gov, 301–427–8503; or Larry Redd, Jr., larry.redd@noaa.gov, 301–427–8503.

SUPPLEMENTARY INFORMATION: Atlantic HMS fisheries, including BFT fisheries, are managed under the authority of the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*). The 2006 Consolidated Atlantic HMS Fishery Management Plan (FMP) and its amendments are implemented by regulations at 50 CFR part 635. Section 635.27 divides the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) and as implemented by the United States among the various domestic fishing categories, per the allocations established in the 2006 Consolidated HMS FMP and its amendments. NMFS is required under the Magnuson-Stevens Act to provide U.S. fishing vessels with a reasonable opportunity to harvest quotas under relevant international fishery agreements such as the ICCAT Convention, which is implemented domestically pursuant to ATCA.

As described in § 635.27(a), the current baseline U.S. BFT quota is 1,316.14 metric tons (mt) (not including the 25 mt ICCAT allocated to the United States to account for bycatch of BFT in pelagic longline fisheries in the Northeast Distant Gear Restricted Area). The baseline quotas for the General and Reserve categories are 710.7 mt and 38.2 mt, respectively. The General category baseline quota is suballocated to different time periods. Relevant to this action, the baseline subquota for the October to November time period is 92.4 mt. To date, NMFS has published several actions that resulted in adjustments to the Reserve category quota, including the allowable carryover of underharvest from 2022 to 2023, resulting in an adjusted Reserve category quota of 112.2 mt (88 FR 48136, July 26, 2023; 88 FR 64385,
