**DEPARTMENT OF TRANSPORTATION**

**Federal Aviation Administration**

**14 CFR Part 39**

**[Docket No. FAA-2023-1643; Project Identifier MCAI-2022-01649-A; Amendment 39-22555; AD 2023-19-05]**

**RIN 2120-AA64**

**Airworthiness Directives; British Aerospace (Operations) Limited and British Aerospace Regional Aircraft Airplanes**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** The FAA is superseding Airworthiness Directive (AD) 2017-19-22 for all British Aerospace Regional Aircraft Jetstream Series 3101 and Jetstream Model 3201 airplanes. AD 2017-19-22 required incorporating BAE Systems' Corrosion Prevention and Control program into the Airworthiness Limitations Section (ALS) of the existing instructions for continued airworthiness (ICA) for your airplane, which added new and more restrictive inspections for corrosion that include inspecting the door hinges/supporting structure and attachment bolts for the main spar joint and engine support, and the rudder hinge location on the vertical stabilizer, and applicable corrective actions. Since the FAA issued AD 2017-19-22, the Civil Aviation Authority (CAA) of the United Kingdom (UK) superseded the mandatory continuing airworthiness information (MCAI) issued by the European Aviation Safety Agency (now European Union Aviation Safety Agency) (EASA) to correct an unsafe condition on these products. This AD requires revising the ALS of the existing ICA for your airplane. The FAA is issuing this AD to address the unsafe condition on these products.

**DATES:** This AD is effective November 6, 2023.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of November 6, 2023.

**ADDRESSES:**

**AD Docket:** You may examine the AD docket at [regulations.gov](http://regulations.gov) under Docket No. FAA-2023-1643; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the MCAI, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

**Material Incorporated by Reference:**

- For service information identified in this final rule, contact BAE Systems (Operations) Ltd., Customer Information Department, Prestwick International Airport, Ayrshire, KA9 2RW, Scotland, United Kingdom; phone: +44 3300 488727; fax: +44 1292 675704; email: [RApublications@baesystems.com](mailto:RApublications@baesystems.com); website: [baesystems.com/businesses/regionalaircraft/](http://baesystems.com/businesses/regionalaircraft/).

- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 901 Locust, Kansas City, MO 64106. For information on the

availability of this material at the FAA, call (817) 222-5110. It is also available at [regulations.gov](http://regulations.gov) under Docket No. FAA-2023-1643.

**FOR FURTHER INFORMATION CONTACT:**

Doug Rudolph, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Westbury, NY 11590; phone: (816) 329-4059; email: [doug.rudolph@faa.gov](mailto:doug.rudolph@faa.gov).

**SUPPLEMENTARY INFORMATION:**

**Background**

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2017-19-22, Amendment 39-19052 (82 FR 44502, September 25, 2017) (AD 2017-19-22). AD 2017-19-22 applied to all British Aerospace Regional Aircraft Jetstream Series 3101 and Jetstream Model 3201 airplanes. AD 2017-19-22 required incorporating new revisions to the ALS of the existing ICA for your airplane to incorporate new and more restrictive inspections for corrosion, which include inspecting the door hinges/supporting structure and attachment bolts of the main spar joint and engine support, and the hinge location on the vertical stabilizer, and repair or replacement, as applicable. The FAA issued AD 2017-19-22 to address corrosion on the rudder upper hinge bracket and internal wing, areas of the passenger/crew door hinges and supporting structure, the main spar joint, and the engine support attachment bolts, which could lead to reduced structural integrity with consequent loss of control.

The NPRM published in the **Federal Register** on July 27, 2023 (88 FR 48393). The NPRM was prompted by UK CAA AD G-2022-0021, dated December 21, 2022 (referred to after this as the MCAI), issued by the UK CAA, which is the aviation authority for the UK. The MCAI states that reports were received of corrosion on the rudder tab hinges, fuselage skin beneath the marker beacon antenna external doubler, and fuselage skin beneath the static vent external doubler, resulting in the need for new and more restrictive inspection requirements. The MCAI requires accomplishing the actions specified in BAE Systems Jetstream Series 3100 & 3200 Corrosion Prevention and Control Programme, Manual Ref: JS/CPCP/01, Revision 9, dated April 15, 2022 (BAE Systems CPCP Manual JS/CPCP/01, Revision 9) within the associated threshold and intervals specified in BAE Systems CPCP Manual JS/CPCP/01, Revision 9.

You may examine the MCAI in the AD docket at [regulations.gov](http://regulations.gov) under Docket No. FAA-2023-1643.

In the NPRM, the FAA proposed to require revising the ALS of the existing

ICA for your approved maintenance or inspection program, as applicable, by including new actions, which include inspecting the rudder tab hinges, fuselage skin beneath the marker beacon antenna external doubler, and fuselage skin beneath the static vent external doubler for corrosion, and depending on the inspection results, performing applicable corrective actions.

The FAA is issuing this AD to address corrosion on the rudder tab hinges, fuselage skin beneath the marker beacon antenna external doubler, and fuselage skin beneath the static vent external doubler. The unsafe condition, if not addressed, could lead to reduced structural integrity of the affected parts with consequent loss of control of the airplane.

**Discussion of Final Airworthiness Directive**

**Comments**

The FAA received no comments on the NPRM or on the determination of the costs.

**Conclusion**

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these

products. Except for minor editorial changes, this AD is adopted as proposed in the NPRM.

**Related Service Information Under 1 CFR Part 51**

The FAA reviewed BAE Systems CPCP Manual JS/CPCP/01, Revision 9. This service information specifies procedures for a comprehensive corrosion prevention and control program.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in ADDRESSES.

**Differences Between This AD and the MCAI**

The MCAI applies to Model Jetstream Series 3100 and Jetstream Series 3200 airplanes, which are identified on the FAA type certificates as Jetstream Model 3101 and Jetstream Model 3201 airplanes, respectively.

The MCAI specifies contacting BAE for approved corrective actions instructions and this AD requires, for certain corrective actions, contacting the Manager, International Validation Branch, FAA; UK CAA; British Aerospace (Operations) Limited’s Design Organization Approval (DOA) (for Jetstream Series 3101); or British Aerospace Regional Aircraft’s DOA (for Jetstream Model 3201) for approved corrective action instructions and accomplishing those instructions accordingly. If approved by the DOA, the approval must include the DOA-authorized signature.

The MCAI requires revising the existing aircraft maintenance program (AMP) to introduce the actions specified in BAE Systems CPCP Manual JS/CPCP/01, Revision 9. After the AMP is revised, the MCAI does not require recording AD compliance on a continued basis each time an action in the revised AMP is performed. The AMP is not required for U.S. operators for the affected airplanes; however, this AD requires incorporating BAE Systems CPCP Manual JS/CPCP/01, Revision 9, into the ALS of the existing ICA for your airplane, which has the same intended result as revising the AMP of not needing to record compliance with the AD each time an individual action is accomplished.

The MCAI requires doing all actions in BAE Systems CPCP Manual JS/CPCP/01, Revision 9, from the effective date of UK CAA AD G–2022–0021 and this AD requires doing all actions in BAE Systems CPCP Manual JS/CPCP/01, Revision 9, at the compliance times specified in that manual or within 12 months after the effective date of this AD, whichever occurs later, except for the actions identified in paragraph (g)(3) of this AD.

BAE Systems CPCP Manual JS/CPCP/01, Revision 9 specifies reporting of Level 2 and Level 3 corrosion, and this AD does not.

**Costs of Compliance**

The FAA estimates that this AD affects 42 airplanes of U.S. registry.

The FAA estimates the following costs to comply with this AD:

**ESTIMATED COSTS**

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Revise the ICA .....	1 work-hour × \$85 per hour = \$85 .....	\$0	\$85	\$3,570

The scope of damage found while performing the actions specified in BAE Systems CPCP Manual JS/CPCP/01, Revision 9, could vary significantly from airplane to airplane. The FAA has no data to determine the costs to repair or replace damaged parts on each airplane or the number of airplanes that may require repair.

**Authority for This Rulemaking**

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more

detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

**Regulatory Findings**

The FAA has determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative,

on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

#### The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

### PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

#### § 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive 2017–19–22, Amendment 39–19052 (82 FR 44502, September 25, 2017); and

■ b. Adding the following new airworthiness directive:

**2023–19–05 British Aerospace (Operations) Limited and British Aerospace Regional Aircraft:** Amendment 39–22555; Docket No. FAA–2023–1643; Project Identifier MCAI–2022–01649–A.

#### (a) Effective Date

This airworthiness directive (AD) is effective November 6, 2023.

#### (b) Affected ADs

This AD replaces AD 2017–19–22, Amendment 39–19052 (82 FR 44502, September 25, 2017).

#### (c) Applicability

This AD applies to British Aerospace (Operations) Limited Model Jetstream Model 3101 airplanes and British Aerospace Regional Aircraft Model Jetstream Model 3201 airplanes, all serial numbers, certificated in any category.

#### (d) Subject

Joint Aircraft System Component (JASC) Code 2721, Rudder Tab Control System; 5330, Fuselage Main, Plate/Skin.

#### (e) Unsafe Condition

This AD was prompted by reports of corrosion on the rudder tab hinges, fuselage skin beneath the marker beacon antenna external doubler, and fuselage skin beneath the static vent external doubler. The FAA is issuing this AD to detect and correct corrosion on the rudder tab hinges, fuselage skin beneath the marker beacon antenna external doubler, and fuselage skin beneath the static vent external doubler. The unsafe condition, if not addressed, could lead to reduced structural integrity of the affected parts with consequent loss of control of the airplane.

#### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

#### (g) Required Actions

(1) Before further flight after the effective date of this AD, revise the Airworthiness Limitations Section of the existing instructions for continued airworthiness for your approved maintenance or inspection program, as applicable, by incorporating the actions and associated thresholds and intervals, including life limits, specified in BAE Systems Jetstream Series 3100 & 3200 Corrosion Prevention and Control Programme, Manual Ref: JS/CPCP/01, Revision 9, dated April 15, 2022 (BAE Systems CPCP Manual JS/CPCP/01, Revision 9).

(2) The actions required by paragraph (g)(1) of this AD may be performed by the owner/operator (pilot) holding at least a private pilot certificate and must be entered into the aircraft records showing compliance with this AD in accordance with 14 CFR 43.9(a) and 14 CFR 91.417(a)(2)(v). The record must be maintained as required by 14 CFR 91.417, 121.380, or 135.439.

(3) Do all the actions in BAE Systems CPCP Manual JS/CPCP/01, Revision 9, as follows:

(i) For all tasks other than 130/EX/01 C3, 140/EX/01 C2, 150/EX/01 C2, 150/EX/01 C3, 150/EX/01 C4, and 200/EX/01 C3: At the compliance times specified in BAE Systems CPCP Manual JS/CPCP/01, Revision 9, or within 12 months after the effective date of this AD, whichever occurs later.

(ii) For tasks 130/EX/01 C3, 140/EX/01 C2, 150/EX/01 C2, 150/EX/01 C3, 150/EX/01 C4, and 200/EX/01 C3: Within 12 months after the effective date of this AD.

(4) If any discrepancy, as identified in BAE Systems CPCP Manual JS/CPCP/01, Revision 9, is found during any inspection or task required by paragraph (g)(3) of this AD, repair or replace, as applicable, all damaged structural parts and components and do the maintenance procedures for corrective action in accordance with and at the compliance time specified in BAE Systems CPCP Manual JS/CPCP/01, Revision 9, except reporting Level 2 and Level 3 corrosion and reporting cracks or other structural defects are not required. If no compliance time is defined, do the applicable corrective action before further flight.

(5) If during any inspection or task required by paragraph (g)(3) of this AD, any discrepancy is found that is not identified in paragraph (g)(4) of this AD or is beyond the repairable limits specified in paragraph (g)(4) of this AD, before further flight, contact either the Manager, International Validation Branch, FAA; Civil Aviation Authority (CAA) of the United Kingdom (UK); British Aerospace (Operations) Limited's Design Organization Approval (DOA) (for Jetstream Series 3101); or British Aerospace Regional Aircraft's DOA (for Jetstream Model 3201) for approved corrective action instructions and accomplish those instructions accordingly. If approved by the DOA, the approval must include the DOA-authorized signature.

#### (h) Provisions for Alternative Actions and Intervals

After the action required by paragraph (g)(1) of this AD has been done, no alternative actions and associated thresholds and intervals, including life limits, are allowed unless they are approved as specified in paragraph (i) of this AD.

#### (i) Alternative Methods of Compliance (AMOCs)

The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (j)(2) of this AD or email to: 9-AVS-AIR-730-AMOC@faa.gov. If mailing information, also submit information by email. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

#### (j) Additional Information

(1) Refer to UK CAA AD G–2022–0021, dated December 21, 2022, for related information. This UK CAA AD may be found in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2023–1643.

(2) For more information about this AD, contact Doug Rudolph, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Westbury, NY 11590; phone: (816) 329–4059; email: [doug.rudolph@faa.gov](mailto:doug.rudolph@faa.gov).

#### (k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) BAE Systems Jetstream Series 3100 & 3200 Corrosion Prevention and Control Programme, Manual Ref: JS/CPCP/01, Revision 9, dated April 15, 2022.

(ii) [Reserved]

(3) For service information identified in this AD, contact BAE Systems (Operations) Ltd., Customer Information Department, Prestwick International Airport, Ayrshire, KA9 2RW, Scotland, United Kingdom; phone: +44 3300 488727; fax: +44 1292 675704; email: [RAPublications@baesystems.com](mailto:RAPublications@baesystems.com); website: [baesystems.com/businesses/regionalaircraft/](https://www.baesystems.com/businesses/regionalaircraft/).

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 901 Locust, Kansas City, MO 64106. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA,

email: [fr.inspection@nara.gov](mailto:fr.inspection@nara.gov), or go to: [www.archives.gov/federal-register/cfr/ibr-locations.html](http://www.archives.gov/federal-register/cfr/ibr-locations.html).

Issued on September 18, 2023.

## DEPARTMENT OF STATE

### 22 CFR Part 181

[Public Notice: 12151]

RIN 1400-AF63

#### Publication, Coordination, and Reporting of International Agreements: Amendments

**AGENCY:** Department of State.

**ACTION:** Final rule; request for comment.

**SUMMARY:** The Department of State (“Department”) finalizes regulations regarding the publication, coordination, and reporting of international agreements. Section 5947 of the James M. Inhofe National Defense Authorization Act for Fiscal Year 2023 made changes regarding the reporting to Congress and publication of the texts of international agreements and related information. The amendments include changes to the scope and deadlines associated with requirements to report international agreements and related information to Congress, and to publish the texts of international agreements in the Treaties and Other International Acts Series (TIAS). These amendments are intended to reflect and to implement the recently enacted changes to the reporting process.

**DATES:**

*Effective date:* This rule is effective on October 2, 2023.

*Comments due date:* The Department of State will consider comments submitted until November 1, 2023.

**ADDRESSES:** Interested parties may submit comments to the Department by any of the following methods:

- *Internet (preferred):* At [www.regulations.gov](http://www.regulations.gov), you can search for the document using Docket Number DOS-2023-0024 or RIN 1400-AF63.

- *Email:* Michael Mattler, Office of the Legal Adviser, U.S. Department of State, [treatyoffice@state.gov](mailto:treatyoffice@state.gov).

- All comments should include the commenter’s name, the organization the commenter represents, if applicable, and the commenter’s address. If the Department is unable to read your comment for any reason, and cannot

contact you for clarification, the Department may not be able to consider your comment. After the conclusion of the comment period, the Department will publish a final rule (in which it will address relevant comments) as expeditiously as possible.

**FOR FURTHER INFORMATION CONTACT:**

Michael Mattler, Assistant Legal Adviser for Treaty Affairs, Office of the Legal Adviser, Department of State, Washington, DC 20520, (202) 647-1345, or at [treatyoffice@state.gov](mailto:treatyoffice@state.gov).

**SUPPLEMENTARY INFORMATION:** The Department of State is implementing amendments to 22 CFR part 181 to reflect the enactment of Section 5947 of the National Defense Authorization Act for Fiscal Year (FY) 2023 (Pub. L. 117-263) (“the NDAA”). Section 5947 amends 1 U.S.C. 112a and 1 U.S.C. 112b, known as the Case-Zablocki Act, regarding the publication, coordination, and reporting to Congress of international agreements.

Section 5947 expands the application of the Case-Zablocki Act’s reporting and publication requirements to include “qualifying non-binding” instruments as defined in the statute. To implement these changes, the rule adds two new sections to 22 CFR part 181: one establishing criteria that will apply to the identification of qualifying non-binding instruments (Section 181.4) and one regarding the process the Department of State will follow for assessing whether particular non-binding instruments constitute “qualifying non-binding instruments” within the meaning of the statute (Section 181.5). These sections follow the form and structure of existing Sections 181.2 and 181.3 which establish comparable criteria and procedures regarding the identification of international agreements.

In accordance with 1 U.S.C. 112b(k)(5), among the elements for determining whether a non-binding instrument is a “qualifying non-binding instrument” for the purposes of the statute is whether the instrument “could reasonably be expected to have a significant impact on the foreign policy of the United States.” Amended 22 CFR 181.3(b)(3) establishes factors for consideration when assessing the significance of a non-binding instrument on the foreign policy of the United States. These factors reflect considerations cited by the Congressional sponsors of section 5947 in connection with Congress’s consideration of the legislation. These factors include whether, and to what extent, the instrument is of importance to the United States’ relationship with

another country, such as by addressing a significant new policy or initiative (rather than ongoing activities or cooperation); affects the rights or responsibilities of U.S. citizens, U.S. nationals, or individuals in the United States; impacts State laws; has budgetary or appropriations impact; requires changes to U.S. law to satisfy commitments made therein; presents a new commitment or risk for the entire Nation; and is of Congressional or public interest.

The procedures set out in 22 CFR 181.4(b) for assessing whether particular non-binding instruments could reasonably be expected to have a significant impact on the foreign policy of the United States provide for such assessments to be made in the first instance by the State Department bureau for instruments negotiated by the Department of State or the U.S. Government agency responsible for negotiating the instrument. On a monthly basis a list of instruments identified by State Department bureaus and U.S. Government agencies as reasonably expected to have a significant impact on the foreign policy of the United States will be submitted to the Under Secretary of State for Political Affairs for approval for transmittal to the Congress in accordance with the Case-Zablocki Act.

Amendments to 22 CFR 181.6 update the procedures by which U.S. Government agencies consult with the Secretary of State regarding international agreements proposed for negotiation or conclusion to reflect developments in practice and technical clarifications since 22 CFR 181.6 was last updated. Amendments to this section also reflect recommendations from the Government Accountability Office designed to facilitate the identification and monitoring of international agreements containing fiscal contingencies that could give rise to future financial losses or other costs for the United States or U.S. Government agencies in amounts that could be material for the purposes of reporting on annual financial statements.

Amendments to 22 CFR 181.7 consolidate in a single section guidance previously contained in other sections of the regulations regarding transmittal by U.S. Government agencies to the Department of State of international agreements and related material. They also include new guidance on the transmittal of qualifying non-binding instruments and related material to reflect new requirements contained in section 5947 of NDAA 2023, as well as
