

Produced by the Extraction or Concentration of Source Material from Ores Processed Primarily for Their Source Material Content,” Criterion 6), in addition, there is no termination of the general license for the DOE’s long-term custody of the site (10 CFR 40.28(b)). Representatives of the NRC must be guaranteed permanent right-of-entry for periodic site inspections. Perpetual access to the site is gained by a local county road.

To meet the NRC’s license requirements at 10 CFR 40.28 and 10 CFR part 40, appendix A, criterion 12, the DOE as long-term custodian must, at a minimum, fulfill the following requirements:

- annual site inspection,
- annual inspection report,
- follow-up inspections and reports, as necessary,
- site maintenance, as necessary,
- emergency measures, and,
- environmental monitoring.

III. Finding of No Significant Impact

Based on its review of the proposed action in the EA, in accordance with the requirements of 10 CFR part 51, the NRC staff determined that approval of the LTSP for the Split Rock, Wyoming UMTRCA Title II disposal site authorizing long-term surveillance activities, will not significantly affect the quality of the human environment. The proposed action would not result in any new construction or expansion of the existing footprint beyond the area previously disturbed and approved. No significant radiological or nonradiological impacts are expected from the long-term surveillance and maintenance. The proposed action will not affect potentially eligible historic properties if any are present. Therefore, the NRC staff determined that pursuant to 10 CFR 51.31, preparation of an environmental impact statement is not required for the proposed action, and pursuant to 10 CFR 51.32, a FONSI is appropriate.
